

Security Management System (SMS) Release Notes

Version 6.5.0.2

This release includes all issues fixed in the *Security Management System Release Notes Version 6.5.0* and *Security Management System Release Notes Version 6.5.0.1*. For details about those changes, refer to the respective Release Notes on the [Online Help Center](#).

Important notes for SMS

- If you are using SMS 6.5.0 and none of your managed devices use the 3.2.0 Digital Vaccine (DV) version, you must upgrade to SMS 6.5.0.2 by manually downloading the package from the TMC website and importing it to the SMS.
- All v6.5.0 customers can optionally apply this patch so that the issues it addresses are corrected. However, upgrades to a later TOS do not require an installation of this patch first.
- Patch installation should take approximately 15 minutes.
- To prevent your account from being disabled while you wait for authentication resources to become available after the reboot, navigate to **Edit > Preferences** and make sure that you deselect **Lock user after failed login attempts** and **Auto reconnect client to server after a disconnect occurs**. The SMS automatically reboots after you install this release. You will then be prompted to update the SMS client.
- This patch can be uninstalled or rolled back to the previous version.

Release contents

The following enhancements or repairs are included in this release.

Description	Reference
This release enhances the reliability of the SMS high-availability communication channel.	PCT-64850
An issue where SMS event logs were not visible has been fixed by making metadata improvements.	PCT-58316 PCT-58983
An audit log file was behaving abnormally. This issue is now fixed.	PCT-64730
An issue with SMS database cleanup has been fixed. Database cleanup now works for historical tables when the SMS is configured for HA.	PCT-66915
An issue with SMS data upload speeds was fixed. This issue caused a long delay for events to display in Trend Vision One. After this patch is installed, there could be a delay before seeing current events while the SMS catches up.	PCT-70269
