# Preface

## Preface

This Installation Guide introduces TXOne StellarProtect™ and guides administrators through installation and deployment.

Topics in this chapter include:

- *About the Documentation on page 2*
- *Audience on page 2*
- *Document Conventions on page 2*
- *Terminology on page 3*

## About the Documentation

TXOne Networks StellarProtect documentation includes the following:

DOCUMENTATION	DESCRIPTION
Readme file	Contains a list of known issues and basic installation steps. It may also contain late-breaking product information not found in the other documents.
Installation Guide	A PDF document that discusses requirements and procedures for installing and managing StellarProtect.
Administrator's Guide	A PDF document that discusses StellarProtect agent installation, getting started information, and server and agent management
Knowledge Base	An online database of problem-solving and troubleshooting information. It provides the latest information about known product issues. To access the Knowledge Base, go to the following website:  <a href="https://kb.txone.com/">https://kb.txone.com/</a>

## Audience

TXOne StellarProtect™ documentation is intended for administrators responsible for StellarProtect™ management, including agent installation. These users are expected to have advanced networking and server management knowledge.

## Document Conventions

The documentation uses the following conventions.

**TABLE 1. Document Conventions**

CONVENTION	DESCRIPTION
UPPER CASE	Acronyms, abbreviations, and names of certain commands and keys on the keyboard
<b>Bold</b>	Menus and menu commands, command buttons, tabs, and options

CONVENTION	DESCRIPTION
<i>Italics</i>	References to other documents
Monospace	Sample command lines, program code, web URLs, file names, and program output
<b>Navigation &gt; Path</b>	The navigation path to reach a particular screen For example, <b>File &gt; Save</b> means, click <b>File</b> and then click <b>Save</b> on the interface
 <b>Note</b>	Configuration notes
 <b>Tip</b>	Recommendations or suggestions
 <b>Important</b>	Information regarding required or default configuration settings and product limitations
 <b>WARNING!</b>	Critical actions and configuration options

## Terminology

The following table provides the official terminology used throughout the TXOne StellarProtect documentation:

TERMINOLOGY	DESCRIPTION
server	The StellarOne console server program
agents	The host running the StellarProtect program
managed agents managed endpoints	The hosts running the StellarProtect program that are known to the StellarOne server program

<b>TERMINOLOGY</b>	<b>DESCRIPTION</b>
target endpoints	The hosts where the StellarProtect™ managed agents will be installed
Administrator (or StellarProtect administrator)	The person managing the StellarProtect agents
StellarProtect console	The user interface for configuring and managing StellarProtect settings
StellarOne (management) console	The user interface for configuring and managing the StellarProtect agents managed by StellarOne
CLI	Command Line Interface
license activation	Includes the type of StellarProtect agent installation and the allowed period of usage that you can use the application
agent installation folder	The folder on the host that contains the StellarProtect agent files. If you accept the default settings during installation, you will find the installation folder at one of the following locations:  C:\Program Files\TXOne\StellarProtect  C:\Program Files\TXOne\StellarProtect (Legacy Mode)

# Chapter 1

## Introduction

This section introduces TXOne StellarProtect the unified agent, and gives an overview of its functions.

Topics in this chapter include:

- *About TXOne Stellar on page 1-2*
- *Key Features and Benefits on page 1-3*
- *What's New on page 1-6*
- *System Requirements on page 1-7*

## About TXOne Stellar

TXOne Stellar provides a context-focused security solution for OT endpoints and cyber-physical systems (CPS), aiming to defend operation stability with continuous detection and response aligned to the specific requirements of the OT domain.

TXOne Stellar platform is composed of the centralized management console server and unified agents apt for legacy OT devices and modern cyber-physical systems.

- StellarOne™, designed to streamline administration of the agents installed on modernized systems and legacy systems, along with its intuitive centralized management, consistent policy enforcement, and action-oriented alerts that empower security teams of all sizes and skill levels to successfully mature their organization's security posture.
- StellarProtect™ / StellarProtect (Legacy Mode), using the single-agent design that delivers seamless asset-centric protection and ensures coverage for modern CPS and legacy OT devices throughout their entire asset lifecycle. The lightweight unified agent simplifies security by combining CPS Detection and Response (CPSDR), threat prevention, operations lockdown, and device control.
  - CPSDR: Embodied within the advanced Operations Behavior Anomaly Detection feature, which establishes a unique baseline fingerprint of each agent-device during practicable operating states and performs fingerprint deviation analysis by means of an expansive industrial application repository and ransomware detection engine to defend against unexpected changes that may impact stability.

Moreover, TXOne Stellar brings the contextualization of security into an operation-led view to allow both the operation and security teams to achieve their goals without needing to compromise. To illustrate, if a device suddenly tried to start launching different applications, it would be blocked from doing so.

From the operation view, this may be an unplanned auto-update that, if run, would take the device offline to reboot. From a security

view, this could be an attempt to access an encryption library that is about to be used to execute ransomware. By applying the operation context, both security and operation-initiated changes can be detected, and appropriate responses are taken.

In both cases, CPSDR stopped the event before it could occur. The security team followed up and resolved the ransomware infection in a different part of the environment. The operation team scheduled the required update for during an upcoming planned maintenance window.

- **Multi-Method Threat Prevention:** Provides advanced threat scan on the basis of ICS root of trust and operations-focused machine learning to secure the agent-devices against known and unknown malware threats without compromising operational availability.
- **Operations Lockdown:** For fixed-function and devices with limited patching availability, operations lockdown enforcement prohibits unauthorized changes, including alterations to registry and function parameters.
- **Trusted Peripheral Control:** Unauthorized access from external sources, such as USB devices, is configurable and controlled to reduce physical access threats.

Leveraging an expansive OT application and certificate library and exclusive ransomware detection engine, TXOne Stellar maintains CPS operational integrity through behavioral anomaly detection and eliminates configuration drift for legacy and fixed-use assets with device lockdown. Security teams can confidently deliver detection and response outcomes across the OT terrain, with TXOne Stellar effectively secure organization's security posture while maintaining its business operations stability.

## Key Features and Benefits

The StellarProtect provides following features and benefits.

**TABLE 1-1. Features and Benefits**

<b>FEATURE</b>	<b>BENEFIT</b>
Cyber-Physical System Detection and Response (CPSDR)	The CPSDR requires a deep understanding of what the expected behaviors for each device are. Embodied within the advanced Operations Behavior Anomaly Detection feature, which primarily defends against unexpected changes that may impact operational stability by comparing daily operation processes and behaviors with a unique baseline of each agent-device and performing comprehensive behavioral analysis not only via identifying baseline deviation but also using TXOne Networks' exclusive industrial application repository and ransomware detection engine.
One unified agent	TXOne StellarProtect simplifies security by combining multi-method threat prevention, operations lockdown, and OT anomaly detection. The unified agent provides long-term support throughout the asset life cycle from modern to legacy.
<b>Scan</b> functions for modern and legacy systems	<p>For modern systems, the StellarProtect provides <b>Multi-Method Threat Prevention</b>; the ICS root of trust and advanced threat scan secure OT assets with no interruption to operations. This feature is the core protection of StellarProtect. TXOne Networks integrates signature-based and AI-based malware detection engine to provide real-time scanning of any file or process activity.</p> <p>Meanwhile, the StellarProtect (Legacy Mode) offers <b>Threat Prevention</b> that persistently scan new and changed files, along with system memory, to provide security assessment for maximum protection against malware in fixed-use and legacy systems.</p>
Application Lockdown	<p>This operations lockdown feature prevents malware attacks and increases protection level by allowing only the files defined in an Approved List to be executed.</p> <p>By preventing programs, DLL files, drivers, and scripts not specified on the Approved List of applications from running (also known as application trust listing), StellarProtect and StellarProtect (Legacy Mode) provide both improved productivity and system integrity by blocking malicious software and preventing unintended use.</p> <p>Furthermore, to ensure operational integrity, Intelligent Runtime Learning allows runtime executable files that are generated by applications in the Approved List to run smoothly.</p>

FEATURE	BENEFIT
Approved List Management	<p>When software needs to be installed or updated, you can use one of the following methods to make changes to the endpoint that automatically adds new or modified files to the Approved List, all without having to unlock TXOne StellarProtect or StellarProtect (Legacy Mode):</p> <ul style="list-style-type: none"> <li>• Maintenance Mode</li> <li>• Trusted Updater (Legacy Mode only)</li> <li>• Predefined Trusted Updater List (Legacy Mode only)</li> <li>• Command Line Interface (CLI)</li> <li>• Trusted hash</li> <li>• Trusted certificate</li> </ul>
DLL Injection Prevention	<p>This feature detects and blocks API call behaviors used by malicious software. Blocking these threats helps prevent malicious processes from running.</p>
Device Control	<p>This feature prevents insider threats by only allowing usage of USB ports on a case-by-case administrator reviewed basis.</p> <hr/> <p> <b>Note</b> For StellarProtect (Legacy Mode), Device Control is included as one of the features of <i>Exploit Prevention</i> settings.</p> <hr/>
Maintenance Mode	<p>To perform file updates on endpoints, users can configure Maintenance Mode settings to define a period when StellarProtect or StellarProtect (Legacy Mode) allows all file executions and adds all files that are created, executed, or modified to the Approved List.</p>
Role Based Administration	<p>TXOne StellarProtect and StellarProtect (Legacy Mode) both provide a separate Administrator and User account, providing full control during installation and setup, as well as simplified monitoring and maintenance after deployment.</p>
Self Protection	<p>With self protection features, StellarProtect/StellarProtect (Legacy Mode) are capable of defending its processes and resources, required to function properly, from being disabled by programs or actual users.</p>

FEATURE	BENEFIT
Graphical and Command Line Interfaces	Anyone who needs to check the software can use the console, while system administrators can take advantage of the command line interface (CLI) to access all of the features and functions available.
Features designed specifically for modernized assets: <ul style="list-style-type: none"> <li>• OT Application Safeguard</li> <li>• Operations Behavior Anomaly Detection</li> </ul>	For modernized assets, StellarProtect offers features such as <b>OT Application Safeguard</b> and <b>Operations Behavior Anomaly Detection</b> that detect behavioral anomalies and quickly determine operational credibility using an expansive library of OT applications and certificates.  <b>OT Application Safeguard</b> intelligently locates and secures the operational integrity of the critical OT applications by preventing the un-authorized changes. TXOne Networks continuously builds up the only OT context-focused database that can identify thousands of applications and certificates to ensure undisturbed operations.  Meanwhile, <b>Operations Behavior Anomaly Detection</b> detects abnormal operations and exercises least privilege-based control to prevent malware-free attacks by means of its auto-learn runtime behavior to adapt to the dynamic needs of autonomous operations.
Features designed specifically for legacy assets: <ul style="list-style-type: none"> <li>• Write Protection</li> <li>• Fileless Attack Prevention</li> <li>• Exploit Prevention settings</li> </ul>	For fixed-use and legacy systems, StellarProtect (Legacy Mode) provides more options available from Application Lockdown settings. <b>Write Protection</b> blocks modification and deletion of files, folders, and registry entries; <b>Fileless Attack Prevention</b> detects and blocks unapproved process chains and arguments that may lead to a fileless attack event.  For advanced threat prevention, StellarProtect (Legacy Mode) <i>Exploit Prevention</i> settings includes Intrusion Prevention, Execution Prevention, and Device Control to stop threats from spreading to the endpoint or executing.

## What's New

TXOne StellarProtect 3.1 Patch 1 provides following new features and enhancements.

**TABLE 1-2. What's New in TXOne StellarProtect 3.1 Patch 1**

FEATURE	BENEFIT
Enhanced licensing errors handling	Identifies and displays licensing related errors that help facilitate license activation or renewal process when certain issues occur.
Protection stop/resume button available to the User account	Not restricted to the Administrator account anymore, the access to the protection stop/resume button is now also available to the User account.
Auto resuming protection after device reboot is configurable now	StellarProtect or StellarProtect (Legacy Mode) can be configured via the GUI or CLI to automatically resuming protection after device reboot.

## System Requirements

This section introduces the system requirements for StellarProtect, including hardware and OS requirements.

### Software and Hardware Requirements

TXOne StellarProtect/StellarProtect (Legacy Mode) does not have specific hardware requirements beyond those specified by the operating system, with the following exceptions:

**TABLE 1-3. Required Hardware for StellarProtect/StellarProtect (Legacy Mode)**

HARDWARE	DESCRIPTION
Available free disk space	400MB  <hr/>  <b>Note</b> <ul style="list-style-type: none"> <li>• Recommended free disk space for StellarProtect Single Installer required during the installation process: 1.5GB</li> <li>• Minimum memory usage required when Application Lockdown and Real-Time Scan are both enabled:               <ul style="list-style-type: none"> <li>• StellarProtect: 350MB</li> <li>• StellarProtect (Legacy Mode): 300MB</li> </ul> </li> <li>• Minimum memory usage required when Application Lockdown is enabled and Real-Time Scan is disabled:               <ul style="list-style-type: none"> <li>• StellarProtect: 120MB</li> <li>• StellarProtect (Legacy Mode): 100MB</li> </ul> </li> </ul>
Monitor and resolution	VGA (640 x 480), 16 colors

**TABLE 1-4. Required Software for StellarProtect**

SOFTWARE	DESCRIPTION
.NET framework	Version 3.5 SP1 or 4.0 available

**Note**

StellarProtect (Legacy Mode) does not have the software requirement for .NET framework.

By default, StellarProtect/StellarProtect (Legacy Mode) uses port 14336 as the listening port for StellarOne, which is sometimes blocked by firewalls. Please make sure this port is kept open for StellarProtect's use.

The Active Update server link for StellarProtect/StellarProtect (Legacy Mode) has been changed to **https://ttau.cs.txone.com**. Please ensure that you whitelist this URL in your firewall.

---

### Important

- StellarProtect/StellarProtect (Legacy Mode) cannot be installed on a system that already runs one of the following:
  - Trend Micro OfficeScan
  - Trend Micro Titanium
  - Other Trend Micro endpoint solutions
  - Other antivirus products
- Ensure that the following root certification authority (CA) certificates are installed with intermediate CAs, which are found in StellarSetup.exe. These root CAs should be installed on the StellarProtect/StellarProtect (Legacy Mode) agent environment to communicate with StellarOne.
  - Intermediate Symantec Class 3 SHA256 Code Signing CA
  - Root VeriSign Class 3 Public Primary Certification Authority - G5
  - DigiCert Assured ID Root CA (Legacy Mode only)
  - DigiCert Trusted Root G4 (Legacy Mode only)

To check root CAs, refer to the [Microsoft support site](#).

---

### Note

Memory Randomization (Legacy Mode only), API Hooking Prevention (Legacy Mode only), and DLL Injection Prevention are not supported on 64-bit platforms.

---

## Operating Systems

### Windows Client:

- Windows 2000 (SP4) [Professional] (32bit)
- Windows XP (SP1/SP2/SP3) [Professional/Professional for Embedded Systems] (32bit)
- Windows Vista (NoSP/SP1/SP2) [Business/Enterprise/Ultimate] (32bit)
- Windows 7 (NoSP/SP1) [Professional/Enterprise/Ultimate/Professional for Embedded Systems/Ultimate for Embedded Systems] (32/64bit)
- Windows 8 (NoSP) [Pro/Enterprise] (32/64bit)
- Windows 8.1 (NoSP) [Pro/Enterprise/with Bing] (32/64bit)
- Windows 10 [Pro/Enterprise/IoT Enterprise] (32/64bit), LTSC 2015, Anniversary Update, LTSC 2016, Creators Update, Fall Creators Update, April 2018 Update, October 2018 Update\*, LTSC 2019, May 2019 Update, November 2019 Update, May 2020 Update, October 2020 Update, May 2021 Update, November 2021 Update, LTSC 2021, 2022 Update
- Windows 11 (NoSP) [Pro/Enterprise] (64bit) 2022 Update, 2023 Update
- Windows Embedded POSReady 2009 (32bit)
- Windows Embedded Standard 7 (NoSP/SP1) (32/64bit)
- Windows Embedded POSReady 7 (NoSP) (32/64bit)
- Windows Embedded 8 Standard (NoSP) (32/64bit)
- Windows Embedded 8 Industry (NoSP) [Pro/Enterprise] (32/64bit)
- Windows Embedded 8.1 Industry (NoSP) [Pro/Enterprise/Sideloadable] (32/64bit)

**Note**

Windows 10 October 2018 Update is also known as version 1809, of which Microsoft resumed the public rollout on November 13, 2018.

---

**Windows Server:**

- Windows Server 2000 (SP4) (32bit)
- Windows Server 2003 (SP1/SP2) [Standard/Enterprise/Storage] (32bit)
- Windows Server 2003 R2 (NoSP/SP2) [Standard/Enterprise/Storage] (32bit)
- Windows Server 2008 (SP1/SP2) [Standard/Enterprise/ Storage] (32/64bit)
- Windows Server 2008 R2 (NoSP/SP1) (Standard/Enterprise/Storage) (64bit)
- Windows Server 2012 (NoSP) (Essentials/Standard] (64bit)
- Windows Server 2012 R2 (NoSP) (Essentials/Standard] (64bit)
- Windows Server 2016 (NoSP) [Standard] (64bit)
- Windows Server 2019 (NoSP) [Standard] (64bit)
- Windows Server 2022 (NoSP) [Standard] (64bit)
- Windows Storage Server 2012 (NoSP) [Standard] (64bit)
- Windows Storage Server 2012 R2 (NoSP) [Standard] (64bit)
- Windows Storage Server 2016 (NoSP) (64bit)

**Note**

- See the latest StellarProtect readme file for the most up-to-date list of supported operating systems for agents.
- See [StellarProtect \(Legacy Mode\) Limitations by Operating Systems on page A-1](#) for the limitations of the StellarProtect (Legacy Mode) installed on certain operating systems.

# Chapter 2

## Installation

This chapter shows how to install the TXOne StellarProtect/StellarProtect (Legacy Mode) agent.

Topics in this chapter include:

- *Agents Installed in Managed or Standalone Mode on page 2-2*
- *Getting the Agent's Installer Package on page 2-2*
- *Setup Configuration File on page 2-5*
- *Installation Methods on page 2-42*
- *License Activation for Standalone Agent on page 2-88*
- *Replicating Installation Configuration for Multiple Standalone Agents on page 2-102*
- *Proxy Settings on page 2-102*

## Agents Installed in Managed or Standalone Mode

TXOne Stellar offers two modes for agent management:

- Agents installed in **Managed** mode are managed by a StellarOne server, which can issue remote commands to all managed agents. To deploy agent configuration settings to multiple managed agents, launch the StellarOne web console and use the toolbar commands located on the **Agents** management screen or the policy settings located on the **Policy** configuration screen. See [Deployment Using StellarOne on page 3-3](#) for more information.
- Agents installed in **Standalone** mode are not managed by a TXOne StellarOne central management console server; instead, they are managed by the local administrator or operator. To manually deploy a single configuration to multiple standalone agents, use an agent configuration file. See [Deployment for Standalone Agents on page 3-2](#) for more information.

## Getting the Agent's Installer Package

For agents managed by the StellarOne server, see [Getting the Agent's Installer Package from StellarOne on page 2-2](#).

For standalone agents, see [Getting the Standalone Agent's Installer Package on page 2-4](#).

## Getting the Agent's Installer Package from StellarOne

For agents managed by the StellarOne server, follow instructions below to get the agent's installer package.

---

### Procedure

1. Log on the StellarOne web console.

**Note**

If this is the first time the StellarOne console being logged on, refer to *StellarOne Installation Guide* for detailed instructions on the initial settings.

2. Go to **Administration > Downloads/Updates > Agent** and click **Download** to download the agent's Installer Package.

**FIGURE 2-1. StellarOne Downloads/Updates Screen - Agent Page**

stellarOne

Dashboard Agents Logs Administration About

### DOWNLOADS/UPDATES

StellarOne **Agent**

Download Installer Package

- ① If the communication between StellarOne and StellarProtect (Legacy Mode) uses proxy, configure the settings on the [Proxy](#) page before downloading the installer package.
- ① To register Agent to a specific group directly, you can [download Group.ini](#) with the group ID and name, then add it into the installer package.  
> [Learn More](#)

English

Patch

StellarProtect

File Name	Version
No data to display	

A zipped folder is downloaded. Extract the folder and proceed with the installation for the agents.

**Note**

The installer package downloaded from StellarOne contains StellarOne data files and license information, and can be used for StellarProtect or StellarProtect (Legacy Mode) installation. After being invoked, the installer package can identify the version of Windows installed on the endpoint and launch the suitable agent installer for the endpoint to install.

---

3. (Optional) To register agents to a group during installation, users can also download the `Group.ini` file.
    - a. Click the **download Group.ini** link on the StellarOne **Administration > Downloads/Updates > Agent** page.
    - b. A pop-up windows appears. Select a group for the target agent.
    - c. Click **Download**. A file named `Group.ini` is downloaded.
    - d. Place the `Group.ini` file as the top-level file in the agent's installer package.
- 

## Getting the Standalone Agent's Installer Package

For standalone agents, follow instructions below to get the agent's latest installer package.

---

### Procedure

1. Go to our [Software Download Center](#).
2. Find **StellarProtect** and click it. You will be directed to the web page with the latest firmware version for StellarProtect.
3. Be sure you are on the **Product Download/Update** tab page.
4. Find the file name starting with `txsp-single-installer-` and click it to download the StellarProtect single installer package.

**Note**

The StellarProtect single installer package contains the StellarProtect and StellarProtect (Legacy Mode) installers. After being invoked, the installer package can identify the version of Windows installed on the endpoint and launch the suitable agent installer for the endpoint to install.

## Setup Configuration File

TXOne Networks pre-defines most of the values of the properties within the `StellarSetup.ini` file, which can be found in the installer package and used directly or adapted for different installation requirements. The launcher will parse `StellarSetup.ini` while executing.

Topics in this section include:

- See [Comparison of Configuration Files Downloaded from Different Sources on page 2-5](#) for the differences between the setup config files of StellarOne managed and the standalone agents
- See [Properties in the Config File on page 2-7](#) for more information about the setup config file and the properties used
- See [Encrypting Config File on page 2-41](#) for how to encrypt the setup config file by using the command prompt

## Comparison of Configuration Files Downloaded from Different Sources

Compared with the `StellarSetup.ini` file downloaded from a StellarOne server, that downloaded from the Software Download Center (which can be used to install standalone agents) does not contain the values of the following properties:

- **License data:**

[shared\_license]

- product\_serial\_number

- txone\_license\_file

or

- license\_key
- 

### Important

The corresponding [shared\_license] property varies depending on your support provider:

- If [shared\_license] consists of product\_serial\_number and txone\_license\_file properties, use the **license file** for product activation.
- If [shared\_license] consists of license\_key property, use the **license key** for product activation.

See [Getting the License File and PSN on page 2-92](#) for more information about the license file and product serial number.

---

- **Server data such as IP address and certificate:**

[shared\_server]

- host
- cert

- **Component update server link:**

[protect\_update]/[legacy\_update]

- source
- 

### Note

For standalone agents, the license data are required to specify for the installer to launch. See [Getting the License File and PSN for Standalone Agents on page 2-92](#) for how to get the license file and product serial number for standalone agents.

---

## Properties in the Config File

The following table lists the properties in the `StellarSetup.ini` config file along with the details of their use. If no values are specified in the setup file, the default values will be used.

### Note

- The **[shared\_...]** entry consists of the properties shared by StellarProtect and StellarProtect (Legacy Mode) Agents.
- The **[protect\_...]** entry consists of the properties exclusive to StellarProtect Agent.
- The **[legacy\_...]** entry consists of the properties exclusive to StellarProtect (Legacy Mode) Agent.

**TABLE 2-1. Properties in the StellarSetup.ini File**

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
[Shared_license]	product_serial_number txone_license_file	empty string	The product serial number and license file used for license activation

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
			 <b>Important</b> The corresponding [shared_license] property varies depending on your support provider. See <a href="#">Comparison of Configuration Files Downloaded from Different Sources on page 2-5</a> for more information.
[shared_server]	host cert	empty string server.crt	StellarOne hostname or IP address  The certificate filename for communicating with StellarOne
[shared_proxy]	host	empty string	FQDN, hostname or IP address of Intranet proxy server
	port	empty string	Port number of Intranet proxy server
	username	empty string	Username of Intranet proxy server, required only when the proxy server is configured to authenticate by username and password.

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
	password	empty string	Administrator password. The password will be required by specific functions, including uninstallation, the command line interface, and support tools.
[shared_install]	silent	0	Execute installation in silent mode. Possible values: <ul style="list-style-type: none"> <li>• 0: Do not use silent mode</li> <li>• 1: Use silent mode</li> </ul>
	password	empty string	Specify the Administrator password for logging on the agent console. <hr/>  <b>Important</b> To install in silent mode, you must also specify the Administrator password value. For example: <pre>password=P@ssW0rd silent=1</pre> <hr/>
	user_password	empty string	Specify the User password for logging on the agent console.

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
			 <b>Important</b> The Administrator and User passwords cannot be the same.
			 <b>Note</b> Only the Administrator can enable/disable the User account and grant it access to limited features on the agent console.
	enable_shell_integration	1	Enable or disable shell integration for adding or removing a scan option to or from the Windows context menu. Possible values: <ul style="list-style-type: none"> <li>• 0: Disable shell integration</li> <li>• 1: Enable shell integration</li> </ul>
[shared_debug]	enable_debug_log	0	Enable or disable the debug logging function. Possible values:

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
			<ul style="list-style-type: none"> <li>• 0: Disable debug logging (show the error level logs only)</li> <li>• 1: Enable debug logging</li> </ul>
	enable_engine_debug_log	0	Enable or disable the engine debug logging function. Possible values: <ul style="list-style-type: none"> <li>• 0: Disable engine debug logging</li> <li>• 1: Enable engine debug logging</li> </ul>
[shared_popup]	usb_block	1	Enable or disable the pop-up notification for a blocked USB device. Possible values: <ul style="list-style-type: none"> <li>• 0: Disable</li> <li>• 1: Enable</li> </ul>
	threat_detect	0	Enable or disable the pop-up notification for a detected threat. Possible values: <ul style="list-style-type: none"> <li>• 0: Disable</li> <li>• 1: Enable</li> </ul>
[protect_server] [legacy_server]	port	9443 8000	StellarOne's port for connecting to the StellarProtect or StellarProtect (Legacy Mode) client
[protect_listen] [legacy_listen]	port	14336	The client listening port for StellarOne

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
[protect_update] [legacy_update]	source	empty string	The component update server link
[protect_config] [legacy_config]	include	empty string	<p>Use an installation sample config file to run the silent installation. Choose one of the ways:</p> <ul style="list-style-type: none"> <li>Specify the file path to the installation sample config file</li> <li>Specify the sample file name and put the file as the top-level file in the installer package</li> </ul> <hr/> <p> <b>Note</b> Supports only .yaml or .bin file format</p>
[protect_install]	asset_vendor	empty string	The vendor's name of the asset.
	asset_model	empty string	The model name of the asset.
	asset_location	empty string	The physical location of the asset.
	asset_description	empty string	The description for the asset.
	install_location	empty string → default install path	The installation path of the StellarProtect installer.

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
		C:\Program Files\TXOne  (Default install path is decided in MSI installer)	
	enable_start_menu	1	Enable StellarProtect in the Windows start menu.
	enable_desktop_icon	1	Enable StellarProtect icon to be placed on the desktop.
	enable_systray_icon	1	Enable StellarProtect in the Windows system tray.
	enable_trusted_ics_cert	1	Allow the installer to install ICS code signing certificates during installation.
	enable_prescan	1	Enable malware scan during installation.
	enable_lockdown_al_building	1	Enable the building of Approved List for Application Lockdown.
	enable_lockdown_detection	1	Enable the "detect" mode of Application Lockdown.
[protect_prescan]	action	1	0: None 1: Quarantine
	background	0	1: only executes when the sytem is in idle status

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
	cpu_usage_mode	0	0: always consumes CPU resource for executing prescan  0: Normal (Single thread scan) 1: HIGH (Multi-thread scan)
[protect_client]	import_source	empty string	Use an agent settings sample config file to import the same settings to the target agents.  Specify the path to the folder containing the config file to be imported, e.g., C:\txsp_config
[legacy_Property]	PRESCAN	1	Prescan the endpoint before installing StellarProtect (Legacy Mode). Possible values: <ul style="list-style-type: none"> <li>• 0: Do not prescan the endpoint</li> <li>• 1: Prescan the endpoint</li> </ul>
	WEL_SIZE	10240	Windows Event Log size (KB). Possible values: Positive integer

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
			 <b>Note</b> Default value for new installations. Upgrading StellarProtect (Legacy Mode) does not change any user- defined WEL_SIZE values set in the previous installation.
	WEL_RETENTION	0	Windows Event Log option when maximum event log size is reached on Windows Event Log. Possible values:  For Windows XP or earlier platforms: <ul style="list-style-type: none"> <li>• 0: Overwrite events as needed</li> <li>• 1~365: Overwrite events older than (1~365) days</li> <li>• -1: Do not overwrite events (clear logs manually)</li> </ul> For Windows Vista or later platforms: <ul style="list-style-type: none"> <li>• 0: Overwrite events as needed (oldest events first)</li> </ul>

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
			<ul style="list-style-type: none"> <li>• 1: Archive the log when full, do not overwrite events.</li> <li>• -1: Do not overwrite events (clear logs manually)</li> </ul>
	WEL_IN_SIZE	10240	Windows Event Log size for Integrity Monitor events (KB). Possible values: Positive integer
	WEL_IN_RETENTION	0	<p>Windows Event Log option for when maximum event log size for Integrity Monitor events is reached in the Windows Event Log.</p> <p>For Windows XP or earlier platforms:</p> <ul style="list-style-type: none"> <li>• 0: Overwrite events as needed</li> <li>• 1~365: Overwrite events older than (1~365) days</li> <li>• -1: Do not overwrite events (clear logs manually)</li> </ul> <p>For Windows Vista or later platforms:</p> <ul style="list-style-type: none"> <li>• 0: Overwrite events as needed (oldest events first)</li> <li>• 1: Archive the log when full, do not overwrite events.</li> </ul>

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
			<ul style="list-style-type: none"> <li>-1: Do not overwrite events (clear logs manually)</li> </ul>
	INTEGRITY_MONITOR	0	Enable Integrity Monitor. Possible values: <ul style="list-style-type: none"> <li>0: Disable</li> <li>1: Enable</li> </ul>
	PREDEFINED_TRUSTED_UPDATER	0	Enable Predefined Trusted Updater. Possible values: <ul style="list-style-type: none"> <li>0: Disable</li> <li>1: Enable</li> </ul>
	WINDOWS_UPDATE_SUPPORT	0	Enable Windows Update Support. Possible values: <ul style="list-style-type: none"> <li>0: Disable</li> <li>1: Enable</li> </ul>
	STORAGE_DEVICE_BLOCKING	0	Blocks storage devices, including CD/DVD drives, floppy disks, and USB devices, from accessing managed endpoints. Possible values: <ul style="list-style-type: none"> <li>0: Allow access from storage devices</li> <li>1: Block access from storage devices</li> </ul>
	INIT_LIST	0	Initialize the Approved List during installation. Possible values: <ul style="list-style-type: none"> <li>0: Do not initialize the Approved list During installation</li> </ul>

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
			<ul style="list-style-type: none"> <li>• 1: Initialize the Approved List during installation</li> </ul> <hr/>  <b>Note</b> LIST_PATH has priority over INIT_LIST. For example: If LIST_PATH = liststore.db and INIT_LIST=1 liststore.db is imported and INIT_LIST is ignored.
	LOCKDOWN	0	Turn Application Lockdown on after installation. Possible values: <ul style="list-style-type: none"> <li>• 0: Turn off Application Lockdown</li> <li>• 1: Turn on Application Lockdown</li> </ul>
	FILELESS_ATTACK_PREVENTION	0	Enable the Fileless Attack Prevention feature. Possible values: <ul style="list-style-type: none"> <li>• 0: Disable</li> </ul>

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
	INTELLIGENT_RUNTIME_LEARNING	0	<ul style="list-style-type: none"> <li>• 1: Enable</li> </ul> <p>The agent will allow runtime execution files that are generated by applications in the Approved List. Possible values:</p> <ul style="list-style-type: none"> <li>• 0: Disable</li> <li>• 1: Enable</li> </ul>
	NO_DESKTOP	0	<p>Create a shortcut on desktop. Possible values:</p> <ul style="list-style-type: none"> <li>• 0: Create shortcut</li> <li>• 1: Do not create shortcut</li> </ul>
	NO_STARTMENU	0	<p>Create a shortcut in the Start menu. Possible values:</p> <ul style="list-style-type: none"> <li>• 0: Create shortcut</li> <li>• 1: Do not create shortcut</li> </ul>
	NO_SYSTRAY	0	<p>Display the system tray icon and Windows notifications. Possible values:</p> <ul style="list-style-type: none"> <li>• 0: Create system tray icon</li> <li>• 1: Do not create system tray icon</li> </ul>

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
	CUSTOM_ACTION	0	<p>Custom action for blocked events. Possible values:</p> <ul style="list-style-type: none"> <li>• 0: Ignore</li> <li>• 1: Quarantine</li> <li>• 2: Ask server</li> </ul>
	MAX_EVENT_DB_SIZE	1024	Maximum database file size (MB). Possible values: Positive integer
	INIT_LIST_EXCLUDED_EXTENSION1	log	<p>A file extension to exclude from automatic file enumeration for Approved List initialization.</p> <p>The configuration applies to the Approved List first initialized and all subsequent Approved List updates.</p> <p>Specify multiple extensions by creating new entries with names that start with INIT_LIST_EXCLUDED_EXTENSION, while ensuring that each entry name is unique. For example:</p> <p>INIT_LIST_EXCLUDED_EXTENSION=bmp</p> <p>INIT_LIST_EXCLUDED_EXTENSION2=png</p>
	INIT_LIST_EXCLUDED_EXTENSION2	txt	
	INIT_LIST_EXCLUDED_EXTENSION3	ini	

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
			 <b>Note</b> Specifying file extensions of executable files (e.g., exe, dll and sys) may cause issues with Application Lockdown.
[[legacy_Prescan]	PRESCANCLEANUP	2	Attempt to clean detected files during prescan. Possible values: <ul style="list-style-type: none"> <li>• 0: No action</li> <li>• 1: Clean, or delete if the clean action is unsuccessful</li> <li>• 2: Clean, or quarantine if the clean action is unsuccessful</li> <li>• 3: Clean, or ignore if the clean action is unsuccessful</li> </ul>
	IGNORE_THREAT	2	Cancel installation after detecting malware threat during prescan. Possible values: <ul style="list-style-type: none"> <li>• 0: Cancel</li> <li>• 1: Continue installation after detecting malware threat during prescan</li> </ul>

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
			<ul style="list-style-type: none"> <li>• 2: Continue installation when no malware is detected, or after all detected malware is cleaned, deleted, or quarantined successfully without a system reboot</li> </ul>
	REPORT_FOLDER	empty string	<p>Anabsolute folder path where prescan result reports are saved. Possible values:</p> <ul style="list-style-type: none"> <li>• &lt;folder_path&gt;</li> <li>• &lt;empty&gt;: Defaults to %windir%\temp\prescan\log</li> </ul>
	SCAN_TYPE	Full	<p>The type of scan executed during silent installation. Possible values:</p> <ul style="list-style-type: none"> <li>• Full: Scan all folders on the endpoint</li> <li>• Quick: Scans the following folders: <ul style="list-style-type: none"> <li>• Fixed root drives, e.g., c:\ d:\</li> <li>• System root folder, e.g., c:\Windows</li> <li>• System folder, e.g.,</li> </ul> </li> </ul>

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
			<p>c:\Windows\System</p> <ul style="list-style-type: none"><li>• System32 folder, e.g.,</li></ul> <p>c:\Windows\System32</p> <ul style="list-style-type: none"><li>• Driver folder, e.g.,</li></ul> <p>c:\Windows\System32\Drivers</p> <ul style="list-style-type: none"><li>• Temp folder, e.g.,</li></ul> <p>c:\Users\Trend\AppData\Local\Temp</p> <ul style="list-style-type: none"><li>• Desktop folder including sub folders and files, e.g.,</li></ul> <p>c:\Users\Trend\Desktop</p> <ul style="list-style-type: none"><li>• Specific: Scan folders specified with SPECIFIC_FOLDER entries</li></ul>

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
			 <b>Note</b> The selected value is used as the default value for a UI installation
	COMPRESS_LAYER	2	The number of compressed layers to scan when a compressed file is scanned. Possible values: <ul style="list-style-type: none"> <li>• 0: Do not scan compressed files</li> <li>• 1~20: Scan up to the specified number of layers of a compressed file</li> </ul>
	MAX_FILE_SIZE	0	The largest file allowed for scan <ul style="list-style-type: none"> <li>• 0: Scan files of any sizes</li> <li>• 1~9999: Only scan files equal to or smaller than the specified size (MB)</li> </ul>
	SCAN_REMOVABLE_DRIVE	0	Scan removable drives. Possible values: <ul style="list-style-type: none"> <li>• 0: Do not scan removable drives</li> <li>• 1: Scan removable drives</li> </ul>

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
	FORCE_PRESCAN	0	Perform a prescan before installation. Possible values: <ul style="list-style-type: none"> <li>• 0: Disable</li> <li>• 1: Enable</li> </ul>
<p>[legacy_BlockNotification]</p> <hr/>  <b>Important</b> To enable this feature, make sure to also enable the display for system tray icons and notifications. See NO_SYSTRAY in this table for details. <hr/>	ENABLE	0	Display notifications on managed endpoints when StellarProtect (Legacy Mode) blocks an unapproved file. Possible values: <ul style="list-style-type: none"> <li>• 0: Disable</li> <li>• 1: Enable</li> </ul>
	ALWAYS_ON_TOP	1	Display the file blocking notification on top of other screens. Possible values: <ul style="list-style-type: none"> <li>• 0: Disable</li> <li>• 1: Enable</li> </ul>
	SHOW_DETAILS	1	Display file name, file path, and event time in the notification. Possible values: <ul style="list-style-type: none"> <li>• 0: Disable</li> <li>• 1: Enable</li> </ul>
	AUTHENTICATE	1	Authenticate the user by requesting the administrator password when closing a notification. Possible values: <ul style="list-style-type: none"> <li>• 0: Disable</li> </ul>

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
			<ul style="list-style-type: none"> <li>• 1: Enable</li> </ul>
	TITLE	empty string	Notification title Possible values: <notification_title>
	MESSAGE	empty string	Notification content Possible values: <notification_content>
[legacy_EventLog]	Enable	1	Log events related to StellarProtect (Legacy Mode). Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
	Level_WarningLog	1	Log “Warning” level events related to StellarProtect (Legacy Mode). Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
	Level_InformationLog	0	Log “Information” level events related to StellarProtect (Legacy Mode). Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
	BlockedAccessLog	1	Log files blocked by StellarProtect (Legacy Mode). Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
	ApprovedAccessLog	1	Log files approved by StellarProtect (Legacy Mode). Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
	ApprovedAccessLog_TrustedUpdater	1	Log Trusted Updater approved access. Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
	ApprovedAccessLog_DllDriver	0	Log DLL/Driver approved access. Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
	ApprovedAccessLog_ExceptionPath	1	Log Application Lockdown exception path approved access. Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
	ApprovedAccessLog_TrustedCert	1	Log Trusted Certificates approved access. Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
	ApprovedAccessLog_WriteProtection	1	Log Write Protection approved access. Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> </ul>

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
			<ul style="list-style-type: none"> <li>• 0: Do not log</li> </ul>
	ApprovedAccessLog_TrustedHash	1	Log Trusted Hash approved access. Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
	SystemEventLog	1	Log events related to the system. Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
	SystemEventLog_ExceptionPath	1	Log exceptions to Application Lockdown. Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
	SystemEventLog_WriteProtection	1	Log Write Protection events. Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
	ListLog	1	Log events related to the Approved list. Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
	UsbMalwareProtectionLog	1	Log events that trigger USB Malware Protection. Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
	ExecutionPreventionLog	1	Log events that trigger Execution Prevention. Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
	IntegrityMonitoringLog_FileCreated	1	Log file and folder created events. Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
	IntegrityMonitoringLog_FileModified	1	Log file modified events. Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
	IntegrityMonitoringLog_FileDeleted	1	Log file and folder deleted events. Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
	IntegrityMonitoringLog_FileRenamed	1	Log file and folder renamed events. Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
	IntegrityMonitoringLog_RegValueModified	1	Log registry value modified events. Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
	IntegrityMonitoringLog_RegValueDeleted	1	Log registry value deleted events. Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
	IntegrityMonitoringLog_RegKeyCreated	1	Log registry key created events. Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
	IntegrityMonitoringLog_RegKeyDeleted	1	Log registry key deleted events. Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
	IntegrityMonitoringLog_RegKeyRenamed	1	Log registry key renamed events. Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
	DeviceControlLog	1	Log events related to device access control. Possible values: <ul style="list-style-type: none"> <li>• 1: Log</li> <li>• 0: Do not log</li> </ul>
[legacy_MaintenanceMode]	ENABLE_DURATION	0	Start maintenance mode with this duration immediately after the install process is finished. Possible values: 0- 999 Unit: Hours

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
			 <b>Note</b> The setting of this property applies to standalone agents only.
	SCAN	0	Enable malware scanning for quarantining suspicious files or adding new or changed files to the Approved List. Possible values: <ul style="list-style-type: none"> <li>• 0: No scan (default)</li> <li>• 1: Quarantine                StellarProtect (Legacy Mode) scans files that are created, executed, or modified during the maintenance and quarantines suspicious files</li> <li>• 2: AL                StellarProtect (Legacy Mode) scans files that are created, executed, or modified during the maintenance and adds these files (including files that are detected as malicious) to the Approved List</li> </ul>

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
[legacy_Message]	INITIAL_RETRY_INTERVAL	120	Starting interval, in seconds, between attempts to resend an event to StellarOne  This interval doubles in size for each unsuccessful attempt, until it exceeds the MAX_RETRY_INTERVAL value  Possible values: 0~2147483647
	MAX_RETRY_INTERVAL	7680	Maximum interval, in seconds, between attempts to resend events to StellarOne  Possible values: 0~2147483647
[legacy_MessageRandomization]	TOTAL_GROUP_NUM	1	Number of groups controlled by the server. Possible values: 0~2147483646
	OWN_GROUP_INDEX	0	Index of group which this agent belongs to. Possible values: 0~2147483646
	TIME_PERIOD	0	Maximum amount of time agents have to upload data (in seconds). Possible values: 0~2147483647

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
 <b>Note</b> StellarProtect (Legacy Mode) agents respond as soon as possible to direct requests from StellarOne. For details, see <i>Applying Message Time Groups in the TXOne StellarProtect Administrator's Guide</i> .			

## Hidden Properties in the Config File

Hidden properties requiring users to manually add in the corresponding section are listed in the following tables:

**TABLE 2-2. StellarProtect's Hidden Properties in StellarSetup.ini File**

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
[protect_install]	BYPASS_WINDEFEND_CHECK	0	Bypass checking Windows Defender status

**Note**

The `BYPASS_WINDEFEND_CHECK` property is designed for Windows 7 and Windows Server 2016+ platforms, on which the default setup of StellarProtect requires disabling Windows Defender first. If you would like to bypass checking Windows Defender status to get the StellarProtect installed without disabling Windows Defender, insert a line under the `[protect_install]` section, and then type `bypass_windefend_check: 1`

**TABLE 2-3. StellarProtect (Legacy Mode) Hidden Properties in StellarSetup.ini File**

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
[legacy_Property]	CONFIG_PATH	empty string	The file path to the sample config file used for agent feature settings
	LIST_PATH	empty string	The file path to the Approved List file
	APPLICATION FOLDER	empty string	The installation path for agent program
	QUARANTINE_FOLDER_PATH	empty string	The quarantine path for agent program
	INIT_LIST_PATH	empty string	A folder path to be traversed for the Approved List initialization. Each local disk's root directory will be traversed if empty.

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
			 <p><b>Note</b></p> <p>If the specified folder path doesn't exist or the folder contains any executable or script files that are unable to be added to the Approved List, the installation will be aborted.</p>
	INIT_LIST_PATH_OPTIONAL	empty string	<p>A folder path to be traversed for the Approved List initialization. Each local disk's root directory will be traversed if empty.</p> <hr/>  <p><b>Note</b></p> <p>This property can be used to force the installation regardless of whether the specified folder path exists or the folder contains any executable or script files that are unable to be added to the Approved List,</p>

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
	INIT_LIST_EXCLUDED_FOLDER	empty string	<p>An absolute folder path to exclude from automatic file enumeration for Approved List initialization.</p> <p>The configuration applies to the Approved List first initialized and all subsequent Approved List updates.</p> <p>Specify multiple folders by creating new entries with names that start with INIT_LIST_EXCLUDED_FOLDER</p> <p>Ensure each entry name is unique. For example:</p> <p>INIT_LIST_EXCLUDED_FOLDER= c:\folder1</p> <p>INIT_LIST_EXCLUDED_FOLDER2 =c:\folder2</p> <p>INIT_LIST_EXCLUDED_FOLDER3 =c:\folder3</p> <p>Possible values</p> <ul style="list-style-type: none"> <li>• Folder path supports a maximum length of 260 characters.</li> <li>• Folder paths that do not exist may be specified.</li> <li>• The exclusion applies to subfolders.</li> </ul>
	ALLOW_NON_MASS_STORAGE_USB_DEVICE	0	Allow some drivers (e.g., Touch screen/ Infrared sensor/Android mobile

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
			<p>phone) from being loaded when those hardware devices are plugged in and storage device blocking is enabled.</p> <p>Possible values:</p> <ul style="list-style-type: none"> <li>• 0: Disable (Default)</li> <li>• 1: Enable</li> </ul>
	USER_PASSWORD	empty string	Specify the User password to enable the User account and set its password
	USR_DEBUGLOG_ENABLE	1	<p>Enable debug logging for user sessions. Possible values:</p> <ul style="list-style-type: none"> <li>• 0: Do not log</li> <li>• 1: Log</li> </ul>
	USR_DEBUGLOGLEVEL	256	The number of debug log entries allowed for user sessions
	SRV_DEBUGLOG_ENABLE	1	<p>Enable debug logging for service sessions. Possible values:</p> <ul style="list-style-type: none"> <li>• 0: Do not log</li> <li>• 1: Log</li> </ul>
	SRV_DEBUGLOGLEVEL	256	The number of debug log entries allowed for service sessions
	FW_USR_DEBUGLOG_ENABLE	0	<p>Enable debug log in user session of firewall. Possible values:</p> <ul style="list-style-type: none"> <li>• 0: Disable debug log</li> </ul>

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
			<ul style="list-style-type: none"> <li>• 1: Enable debug log</li> </ul>
	FW_USR_DEBUGLOG_LEVEL	273	Debug level in user session of firewall. Possible values: number
	FW_SRV_DEBUGLOG_ENABLE	0	Enable debug log in service session of firewall. Possible values: <ul style="list-style-type: none"> <li>• 0: Disable debug log</li> <li>• 1: Enable debug log</li> </ul>
	FW_SRV_DEBUGLOG_LEVEL	273	Debug level in service session of firewall. Possible values: number
	BM_SRV_DEBUGLOG_ENABLE	0	Enable debug log of Behavior Monitoring Core service. Possible values: <ul style="list-style-type: none"> <li>• 0: Disable debug log</li> <li>• 1: Enable debug log</li> </ul>
	BM_SRV_DEBUGLOG_LEVEL	51	Debug level of Behavior Monitoring Core service
[legacy_AGENT]	FIXED_IP	empty string	Set the agent IP address to communicate with the StellarProtect (Legacy Mode) server. Possible values: A.B.C.D/E <ul style="list-style-type: none"> <li>• A, B, C, D: 0~255</li> <li>• E: 1~32</li> </ul> An example address might be 10.0.0.0/24 or 192.168.0.1

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
			 <b>Note</b> Ensure that you also input and insert the section title [legacy_AGENT] above the FIXED_IP line.
[legacy_Prescan]	SPECIFIC_FOLDER	empty string	An absolute folder path to scan when the scan type is set [Specific]. Possible values: <folder_path> Multiple folders can be specified by creating new entries whose name starting with SPECIFIC_FOLDER Every entry name needs to be unique. For example: SPECIFIC_FOLDER=c:\fo lder1 SPECIFIC_FOLDER2=c:\f older2 SPECIFIC_FOLDER3=c:\f older3
	EXCLUDED_FILE	empty string	An absolute file path to exclude from scanning Possible values: <file_path>

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
			<p>Multiple files can be specified by creating new entries whose name starting with EXCLUDED_FILE</p> <p>Every entry name needs to be unique.</p> <p>For example:</p> <p>EXCLUDED_FILE=c:\file1.exe</p> <p>EXCLUDED_FILE2=c:\file2.exe</p> <p>EXCLUDED_FILE3=c:\file3.exe</p>
	EXCLUDED_FOLDER	empty string	<p>An absolute folder path to exclude from scanning &lt;folder_path&gt;</p> <p>Multiple folders can be specified by creating new entries whose name starting with EXCLUDED_FOLDER</p> <p>Every entry name needs to be unique</p> <p>For example:</p> <p>EXCLUDED_FOLDER=c:\file1</p> <p>EXCLUDED_FOLDER2=c:\file2</p> <p>EXCLUDED_FOLDER3=c:\file3</p>

SECTION	PROPERTY	DEFAULT VALUE	DESCRIPTION
	EXCLUDED_EXTENSION	empty string	<p>A file extension to exclude from scanning</p> <p>&lt;file_extension&gt;</p> <p>Multiple extensions can be specified by creating new entries whose name starting with EXCLUDED_EXTENSION</p> <p>Every entry name needs to be unique</p> <p>For example:</p> <p>EXCLUDED_EXTENSION=bmp</p> <p>EXCLUDED_EXTENSION2=png</p>

## Encrypting Config File

StellarProtect/StellarProtect (Legacy Mode) supports encrypting the setup config file to prevent sensitive data leakage. The encrypted config file name is fixed to StellarSetup.bin.

### Procedure

1. Prepare your StellarSetup.ini as mentioned in [Setup Configuration File on page 2-5](#).
2. Encrypt StellarSetup.ini by using the command prompt: `StellarSetup.exe -e <CONFIG_FILE>`. The parameter `-e` is used for encrypting the configuration file and generating StellarSetup.bin file in the working directory.
3. After the StellarSetup.bin file is generated, place it as the top-level file in the installer package.

**Note**

For security reasons, the original StellarSetup.ini file can be removed from the installer package since the encrypted setup file (StellarSetup.bin) can replace it now.

---

4. The installation with encrypted configuration can now be executed.
- 

## Installation Methods

This section mainly explains the steps for installing StellarProtect/ StellarProtect (Legacy Mode) using **Attended Installation** or **Silent Installation**.

### Attended Installation of StellarProtect

---

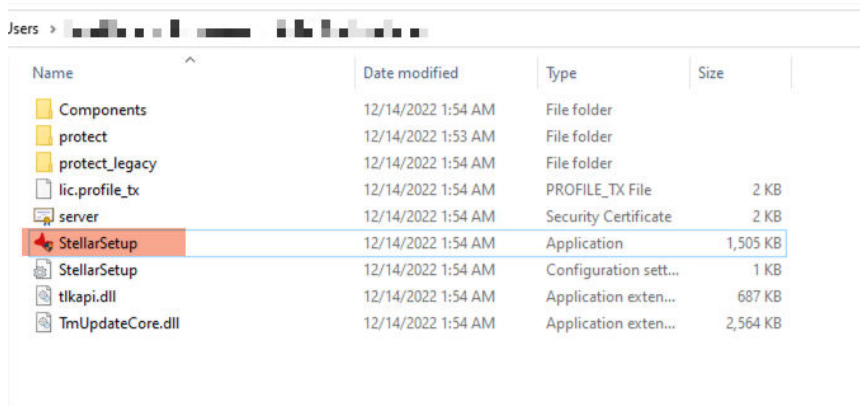

#### Procedure

1. Launch the installer StellarSetup.exe.
- 

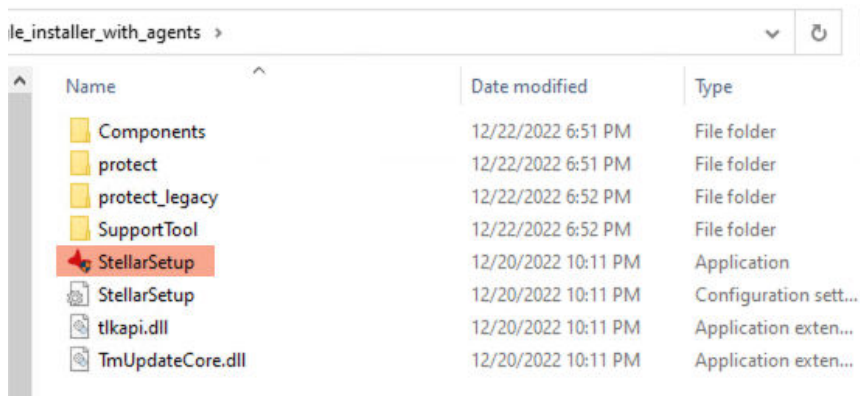

**Note**

- The installer package downloaded from the StellarOne server differs slightly from that downloaded from the Software Download Center. One contains the StellarOne data files and license information while the other one doesn't.
  - For Windows Server 2016 and later versions, the installation of StellarProtect requires turning off Windows Defender first.
-

Name	Date modified	Type	Size

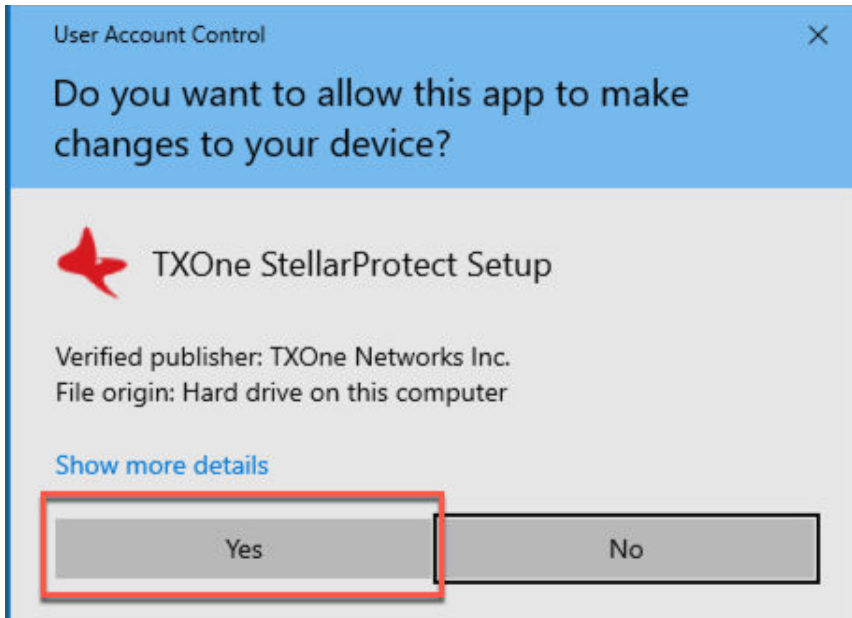

**FIGURE 2-3. Standalone Installer Package Downloaded from Software Download Center**

**Note**

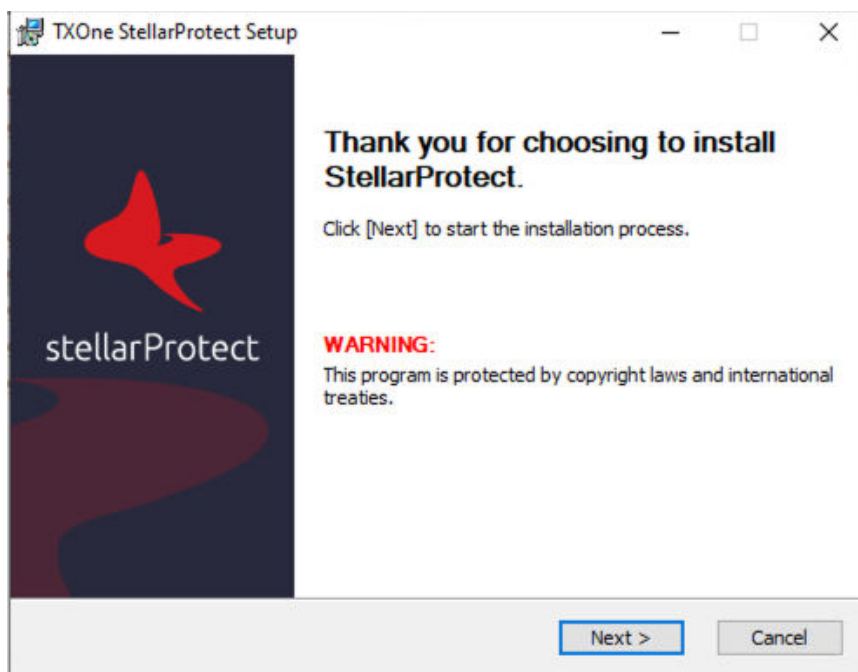

To register StellarProtect agent to a specific group managed by StellarOne during the installation, after downloading the `Group.ini` file from the StellarOne server, the file must be placed as the top-level file in the agent's installer package before starting the installation.

2. Click **Yes** to start the installation.

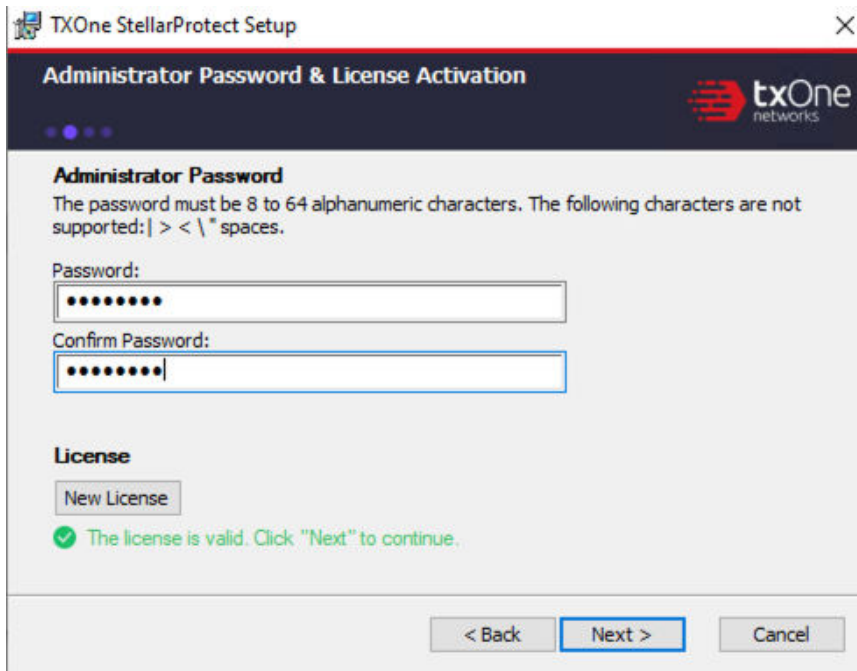

**FIGURE 2-4. StellarProtect Setup Screenshot**

3. Click **Next** to continue.

**FIGURE 2-5. StellarProtect Installation Wizard**

4. A success message indicating valid license appears. Click **Next** to continue.

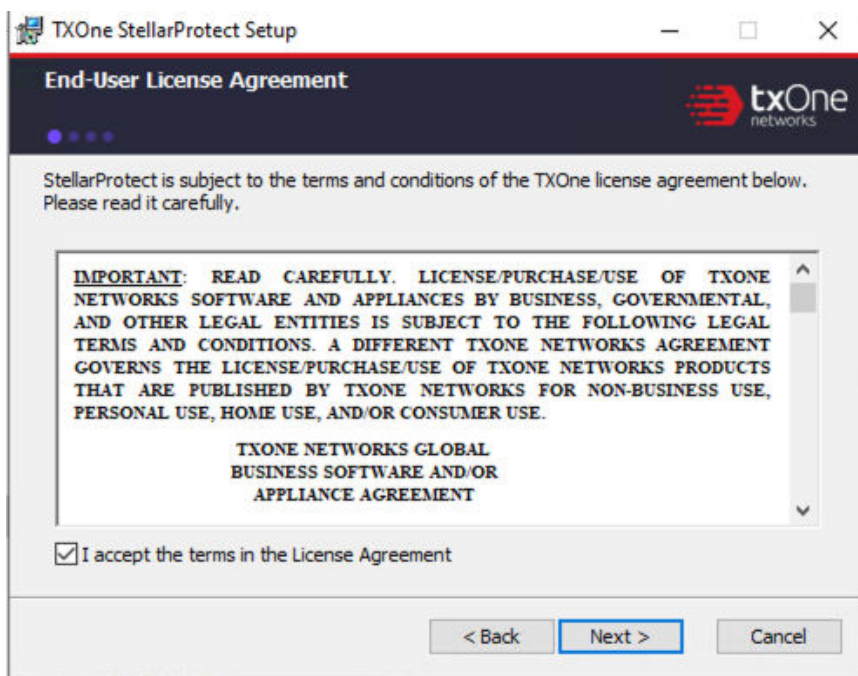

**FIGURE 2-6. Admin Password & License Activation**

**Note**

- If the agent's installer package is downloaded from StellarOne, the installer will automatically check and complete the license activation.
- For standalone agents, see [License Activation for Standalone Agent on page 2-88](#).

5. The **End-User License Agreement (EULA)** window appears. Please read the content carefully, and then check **I accept the terms in the License Agreement** and click **Next**.

**FIGURE 2-7. End-User License Agreement**

6. Create an administrator password.

**Note**

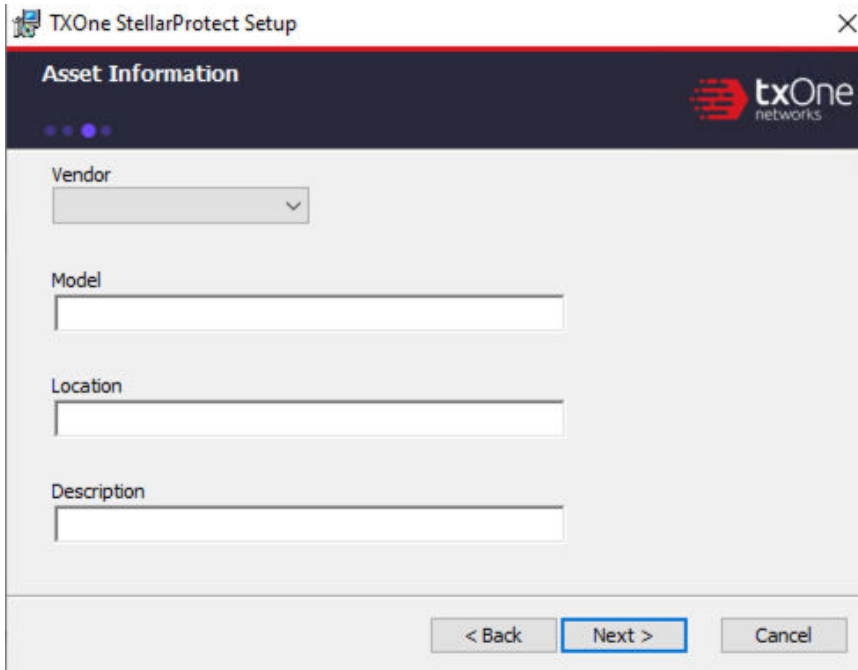

Please use a strong administrator password with good quality in 8 to 64 alphanumeric characters. The following characters are not supported: | > " : < \ spaces.

**Important**

Please store securely and do not lose the StellarProtect administrator password. If you lose the StellarProtect administrator password, please contact TXOne Networks for support.

7. Specify the asset information of the installed device with correct OT-related information such as vendor name, model, location and a description, and then click **Next**.

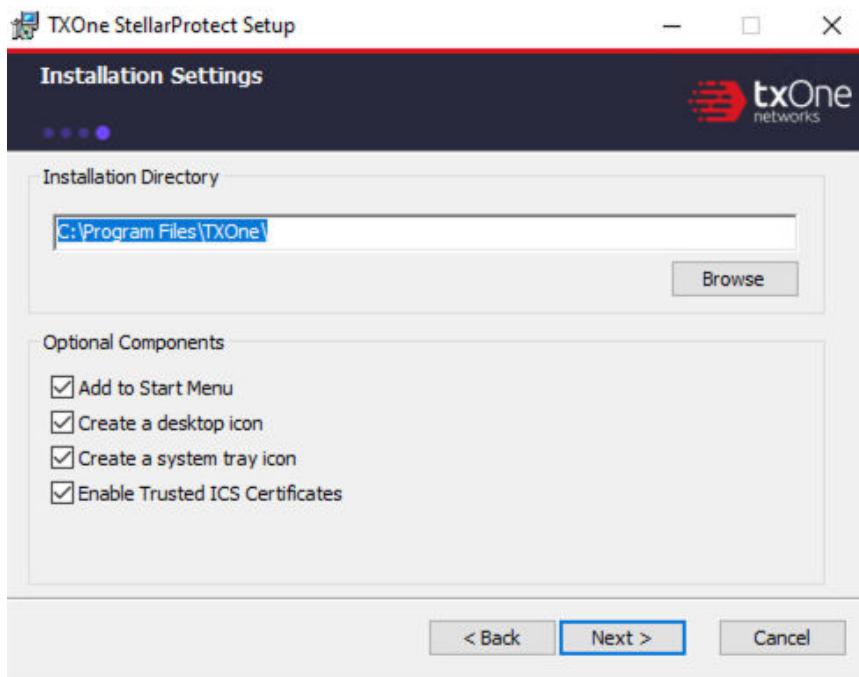

The screenshot shows the 'TXOne StellarProtect Setup' window with the 'Asset Information' tab selected. The window has a dark blue header with the 'txOne networks' logo on the right. Below the header, there are four input fields: 'Vendor' (a dropdown menu), 'Model' (a text box), 'Location' (a text box), and 'Description' (a text box). At the bottom of the window, there are three buttons: '< Back', 'Next >' (highlighted with a blue border), and 'Cancel'.

**FIGURE 2-8. Asset Information**

8. Confirm the installation settings including installation directory and optional components settings.

**FIGURE 2-9. StellarProtect Installation Settings**

**Note**

You can choose to whether or not add an icon to the start menu, create a desktop icon, or create a system tray icon.

**Important**

TXOne Networks suggests selecting **Enable Trusted ICS Certificates**. This feature ensures that StellarProtect can sync up trusted OT certificates and enhance OT applications, thus those installers can always be recognized by StellarProtect.

9. If StellarProtect detects the incompatible software on the endpoint, it will display a message. If not, this message won't appear.

**Note**

Incompatible software means some TrendMicro product such as OfficeScan series, ApexOne, Worry-Free Business Security, Worry-Free Business Security Service. StellarProtect will try to uninstall them to avoid any possible incompatible issue.

- a. During the uninstallation of the incompatible software, a progress bar appears and indicates the status.

**FIGURE 2-10. Status of Installing StellarProtect**

10. (Optional but highly recommended) Toggle on the **Perform prescan...** to start the prescan task. If you toggle it off, go to **Step 11** for next procedure.

**FIGURE 2-11. Prescan Toggle**

TXOne StellarProtect Setup

### Prescan

The prescan function scans the whole device for virus/malware detection and to identify all present OT applications. It is strongly recommended NOT to skip the prescan. If the prescan is skipped, possible security threats may not be discovered. In addition, the operation of OT applications may not run smoothly.

Perform prescan to ensure device security and smooth operations.

### CPU Usage

Scanning files affects the CPU usage. Select the appropriate mode of CPU usage to balance between the scan and the service.

Normal  
To reduce the impact on the service, use CPU resources to scan files when other applications are idle.

High  
To complete the scan faster, use CPU resources as much as possible.

---

### Creating Approved List

It is suggested to create Approved List and enable the Application Lockdown "Detect" mode for the system to send notification to users if applications not in the Approved List launches.

Create Approved List and and enable Application Lockdown "Detect" mode

Next

**Important**

- TXOne Networks recommends performing the Prescan to enable the agent to detect potential security threats and also learn the OT applications installed on the endpoint before completing the installation process.
  - If you skip the Prescan, StellarProtect will not be able to recognize the OT applications before it resumes production, and will need to learn them as they are executed for the first time; this may cause delays in the OT application runtime.
  - StellarProtect provides a more time-efficient option **HIGH** that will require higher CPU usage during the Prescan. If no other vital applications are running on the system, you can select the option **HIGH** to significantly reduce scan time.
- 

**Note**

Since the StellarOEM license edition does not support the scanning function, this procedure will not appear in its installation process.

---

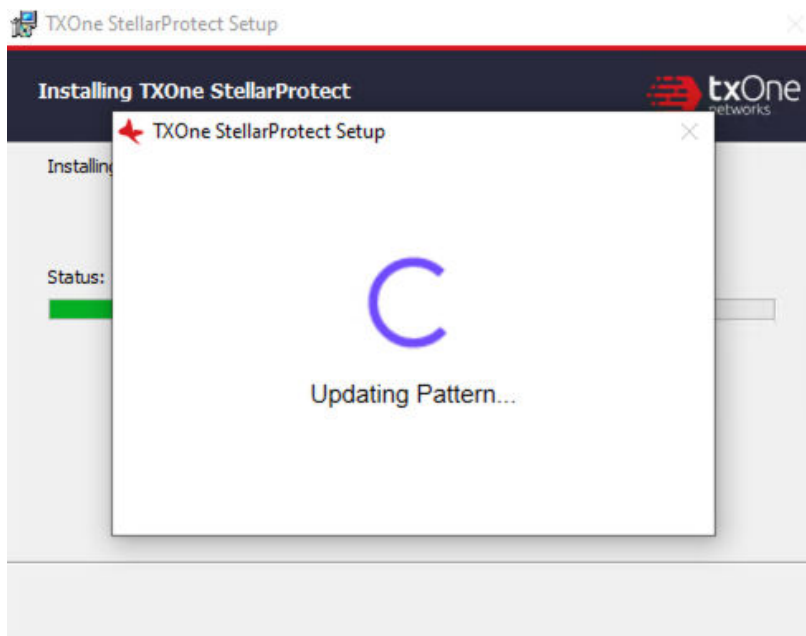

- a. Before the Prescan starts, the installer will perform a components update based on the chosen configuration. The update process will display a message as shown below.
- 

**Note**

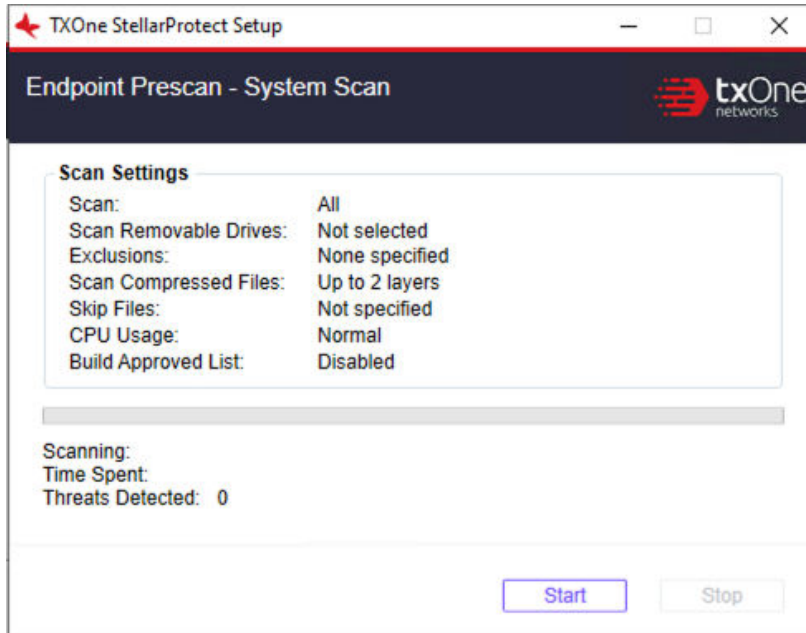

For the standalone agents to perform the update successfully, it is required to allow them to access the Internet for connecting to the Active Update server. If they can't have the Internet connection, the components update will fail; however, you can still choose to proceed to the next step.

---

**FIGURE 2-12. Update Pattern before Prescan**

- b.** View the scan settings and click **Start** to initiate the prescan.

**FIGURE 2-13. View Scan Settings before Prescan**

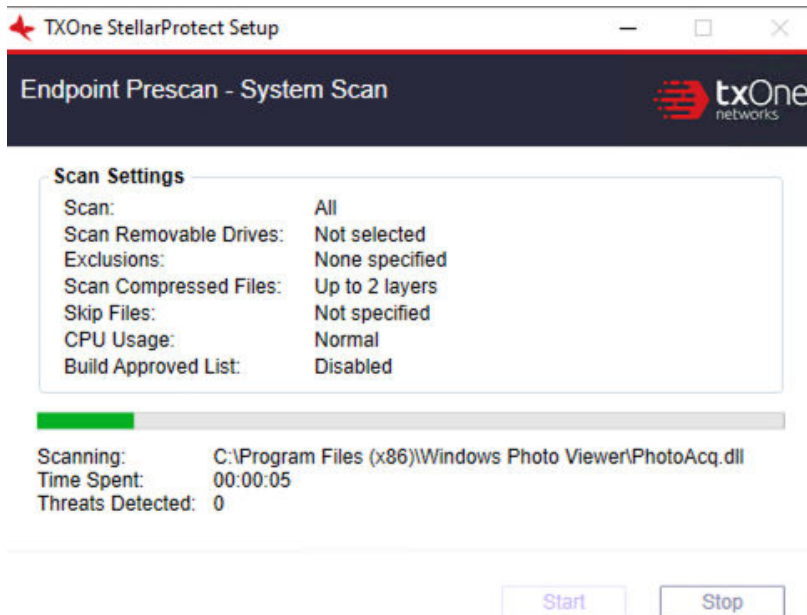

**Note**

Scan settings are described as follows. Please note that only StellarOne administrator can configure the scan settings after the StellarProtect agent is successfully installed.

- **Scan:** This is the default anti-virus scan, following our template
- **Scan Removable Drives:** Selected removable drives will be scanned
- **Exclusion:** Which files or folders won't be scanned
- **Scan Compressed Files:** By default, the agent scans up to 2 layers of compression during the installation. After installed, the agent can be configured to scan up to 20 layers of compression via StellarOne.
- **Skip Files:** Specific files that will be skipped
- **CPU Usage:** CPU consumption during the prescan
- **Build Approved List:** Whether the creation of Approved List is enabled or not

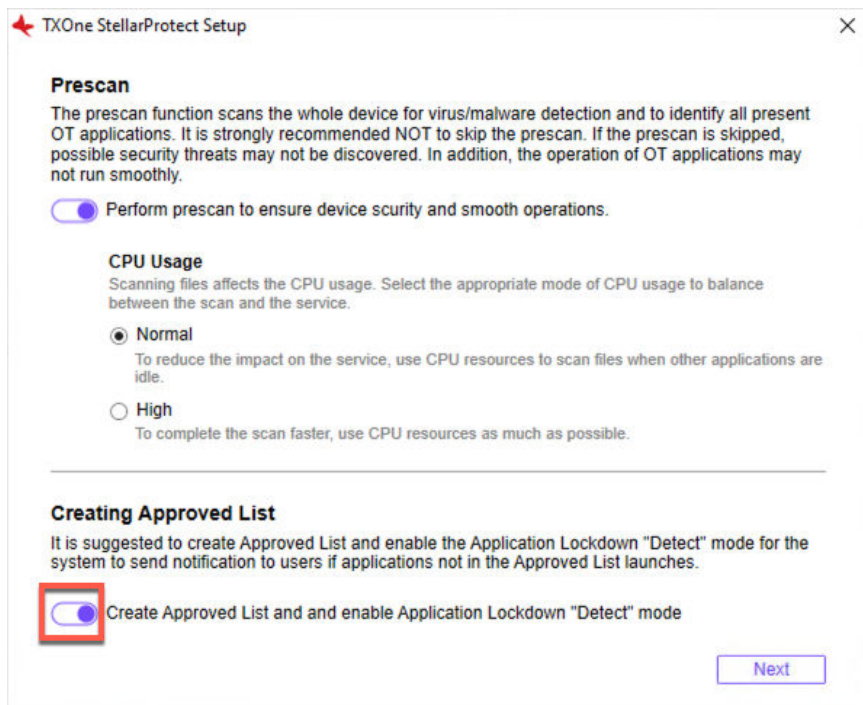

- 
- c. The progress bar shows the status of the prescan.

**FIGURE 2-14. Prescan Status**

- d. After the prescan, results will be shown for review.
- e. If a threat is detected, choose one of the two actions:
  - **Quarantine:** Quarantine the threat.
  - **Continue:** Take no action at this time.
11. (Optional but highly recommended) At the bottom of the window is the switch toggle for creating the Approved List and enabling Application Lockdown "Detect" mode. Toggle it on to proceed. If you toggle it off, go to **Step 12** for next procedure.

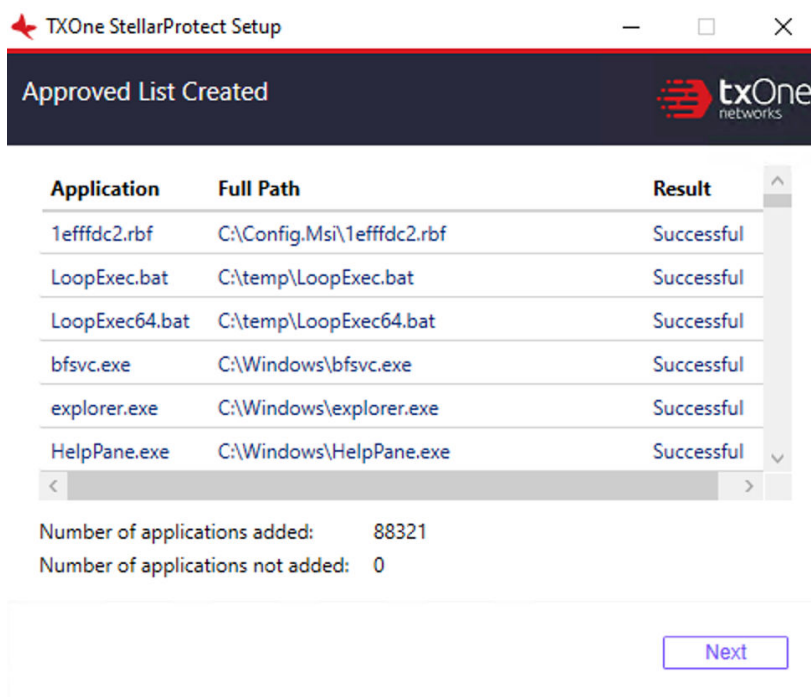

**FIGURE 2-15. Create Approved List & Enable Application Lockdown (Detect)**

**Note**

- The Approved List is created for the Application Lockdown "Detect" mode. Once the Application Lockdown "Detect" mode is enabled, the system will send notifications if applications not in the Approved List launch.
  - Since the StellarKiosk license edition does not support the Application Lockdown function, this procedure will not appear in its installation process.
  - If you choose not to create the Approved List during the installation process, see [Setting Up the Approved List on page 2-74](#) to perform this task later.
- 

- a. The results of adding applications in the Approved List will be shown for review.
- b. The creation of Approved List is complete, click **Next**.

**FIGURE 2-16. Approved List Created**

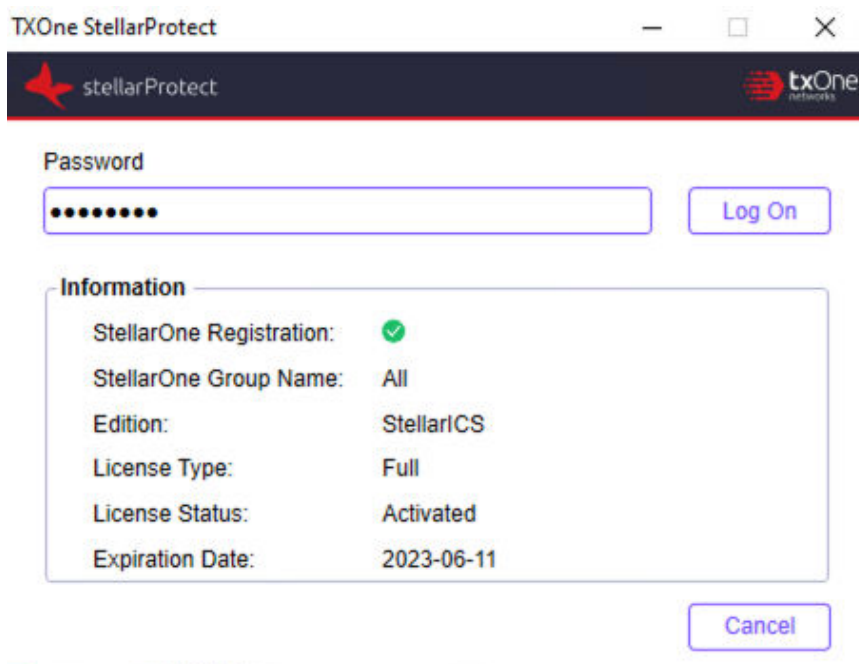

12. The StellarProtect application will be installed.
13. When the installation is complete, the **StellarProtect has been successfully installed** window appears. Click **Finish**.

**FIGURE 2-17. StellarProtect Successfully Installed**

14. Run StellarProtect and log on with your password.

**FIGURE 2-18. Log On StellarProtect**

15. Upon logging into StellarProtect successfully, the **Overview** window will display.
- Before TXOne StellarProtect Application Lockdown feature can protect the endpoint, it must complete the creation of Approved List and enable the Application Lockdown "Enforce" mode. See [Setting Up the Approved List on page 2-74](#) and refer to *TXOne StellarProtect Administrator's Guide* for more information.
  - To modify more TXOne StellarProtect settings, refer to *TXOne StellarProtect Administrator's Guide* for more information.

## Attended Installation of StellarProtect (Legacy Mode)

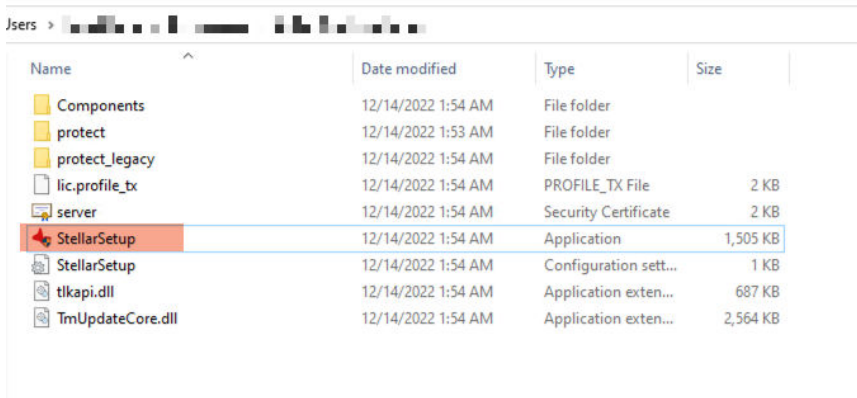

### Procedure

1. Launch the installer StellarSetup.exe.

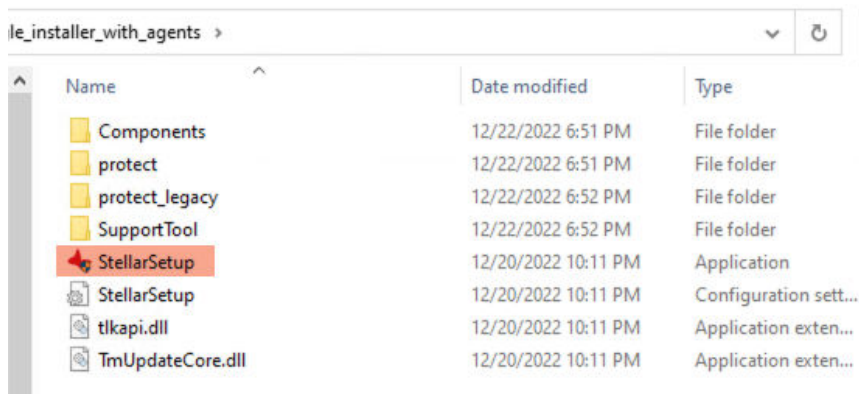

#### Note

The installer package downloaded from the StellarOne server differs slightly from that downloaded from the Software Download Center. One contains the StellarOne data files and license information while the other one does not.

Name	Date modified	Type	Size
Components	12/14/2022 1:54 AM	File folder	
protect	12/14/2022 1:53 AM	File folder	
protect_legacy	12/14/2022 1:54 AM	File folder	
lic.profile_tx	12/14/2022 1:54 AM	PROFILE_TX File	2 KB
server	12/14/2022 1:54 AM	Security Certificate	2 KB
<b>StellarSetup</b>	12/14/2022 1:54 AM	Application	1,505 KB
StellarSetup	12/14/2022 1:54 AM	Configuration sett...	1 KB
tkapi.dll	12/14/2022 1:54 AM	Application exten...	687 KB
TmUpdateCore.dll	12/14/2022 1:54 AM	Application exten...	2,564 KB

**FIGURE 2-19. Installer Package Downloaded from StellarOne**

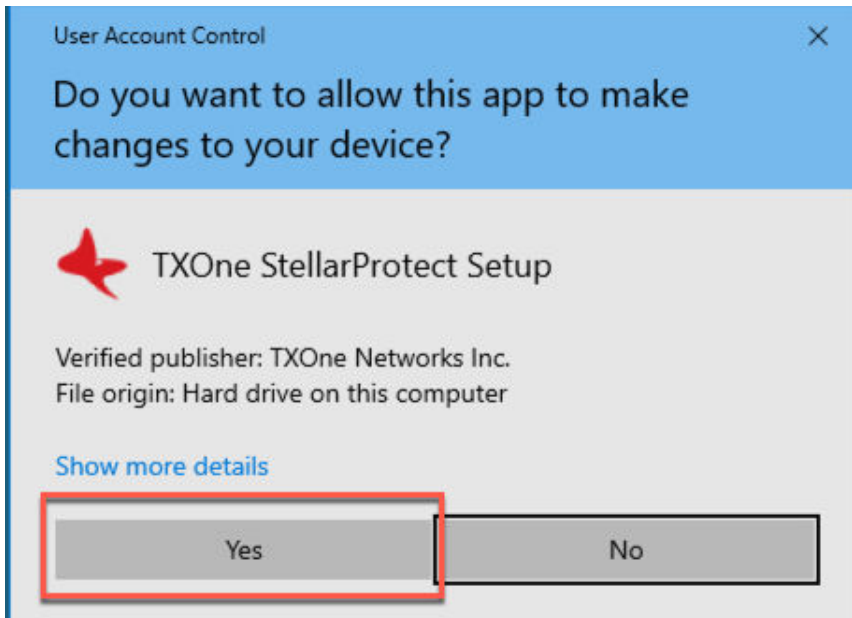

**FIGURE 2-20. Standalone Installer Package Downloaded from Software Download Center**

**Note**

To register a StellarProtect (Legacy Mode) agent to a specific group managed by StellarOne during the installation, after downloading the `Group.ini` file on StellarOne console, the file must be placed as the top-level file in the agent's installer package before starting the installation.

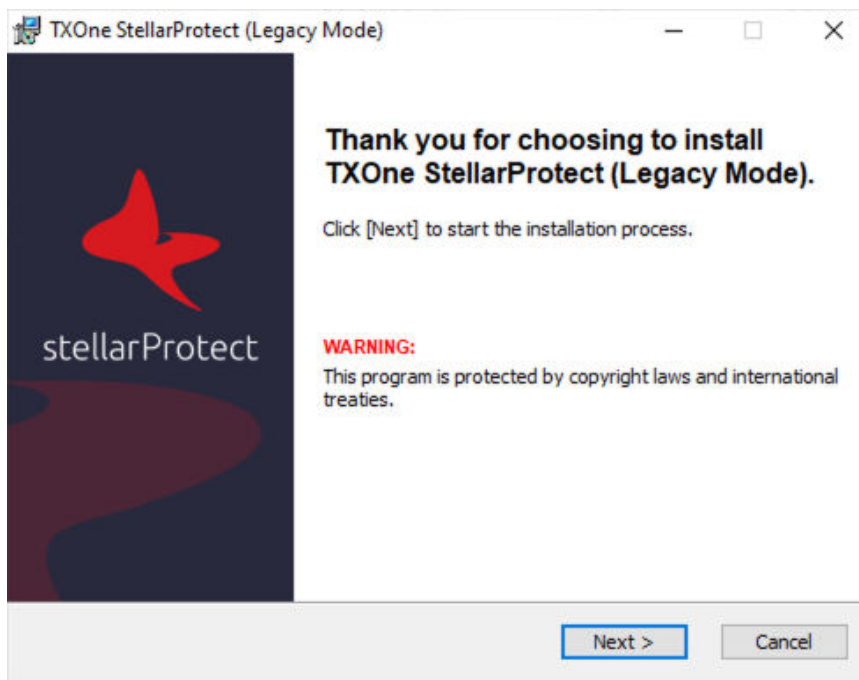

2. Click **Yes** to start the installation.

**FIGURE 2-21. StellarProtect Setup Screenshot**

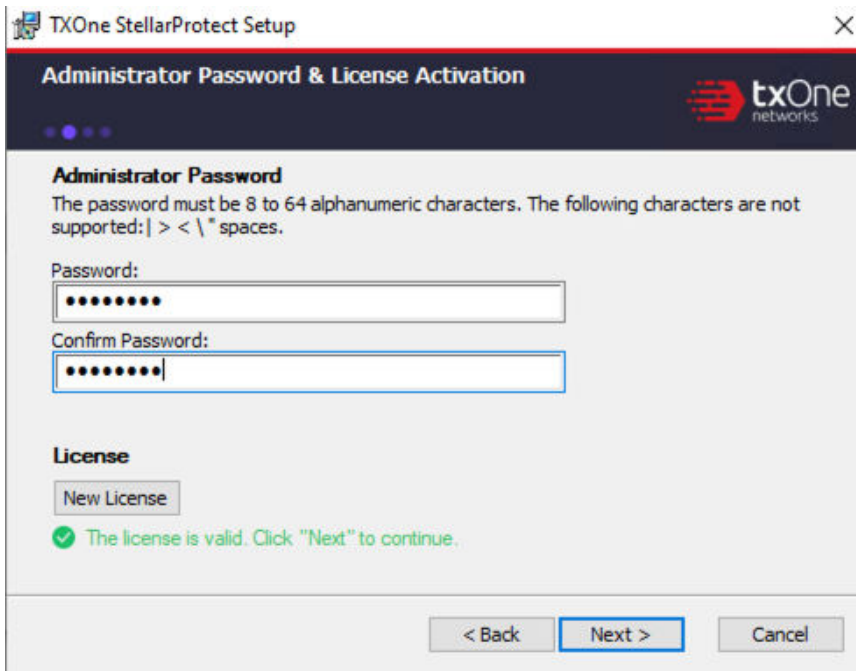

3. Click **Next** to continue.

**FIGURE 2-22. StellarProtect (Legacy Mode) Installation Wizard**

4. A success message indicating valid license appears. Click **Next** to continue.

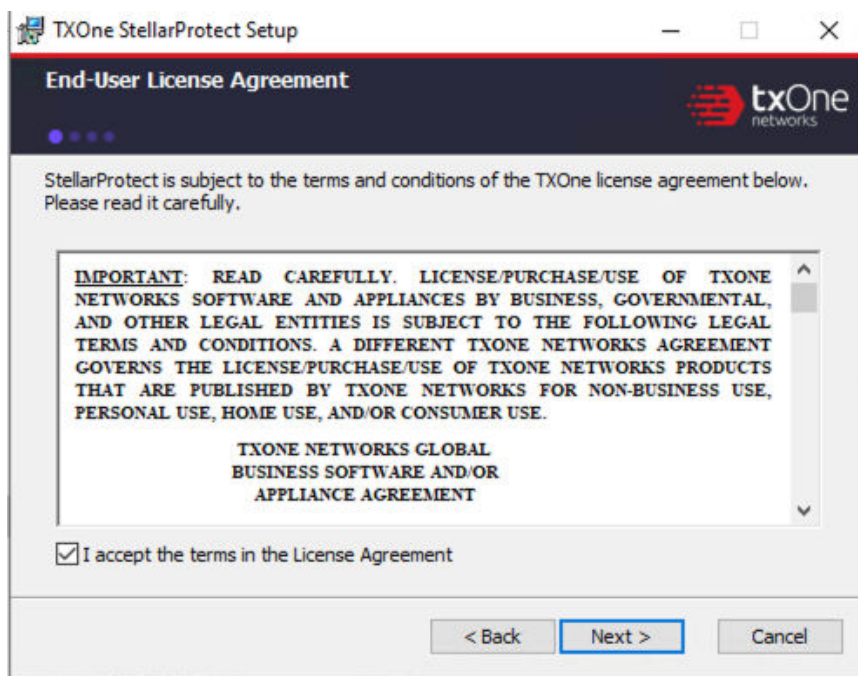

**FIGURE 2-23. Admin Password & License Activation**

**Note**

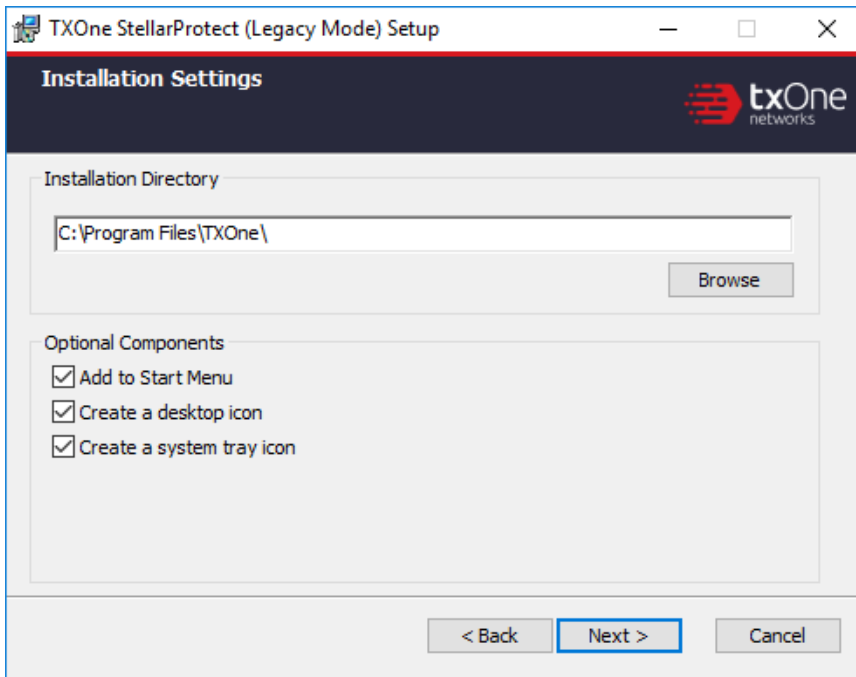

- If the agent's installer package is downloaded from StellarOne, the installer will automatically check and complete the license activation.
- For standalone agents, see [License Activation for Standalone Agent on page 2-88](#).

5. The **End-User License Agreement (EULA)** window appears. Please read the content carefully, and then check **I accept the terms in the License Agreement** and click **Next**.

**FIGURE 2-24. End-User License Agreement**

6. Confirm the installation settings including installation directory and optional components settings.

**FIGURE 2-25. StellarProtect (Legacy Mode) Installation Settings**

**Note**

You can choose to whether or not add an icon to the start menu, create a desktop icon, or create a system tray icon.

7. Create an administrator password.

**Note**

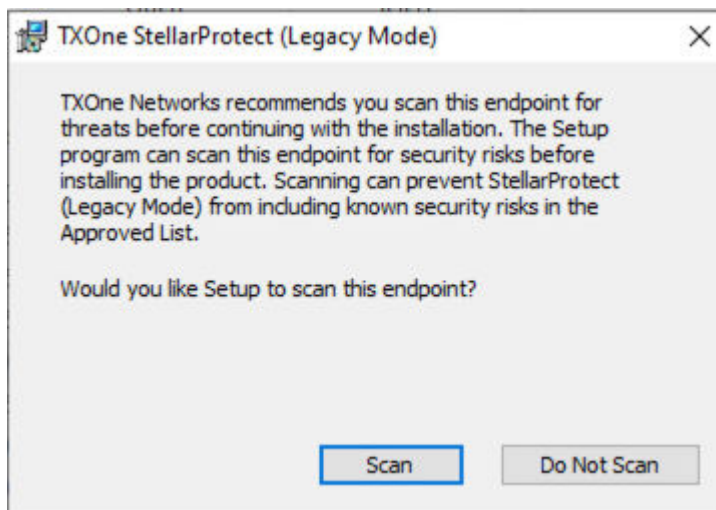

Please use a strong administrator password with good quality in 8 to 64 alphanumeric characters. The following characteres are not supported: | > " : < \ spaces.

The StellarProtect (Legacy Mode) administrator password is unrelated to the Windows administrator password.

**Important**

Please store securely and do not lose the StellarProtect (Legacy Mode) administrator password. If you lose the agent administrator password, please contact TXOne Networks for support.

8. A message appears asking if you would like to scan the endpoint for threats before continuing with the installation.

**FIGURE 2-26. Scan or Do Not Scan**

9. (Optional) Scan the endpoint for threats before continuing with the installation. TXOne Networks recommends you perform this scan.

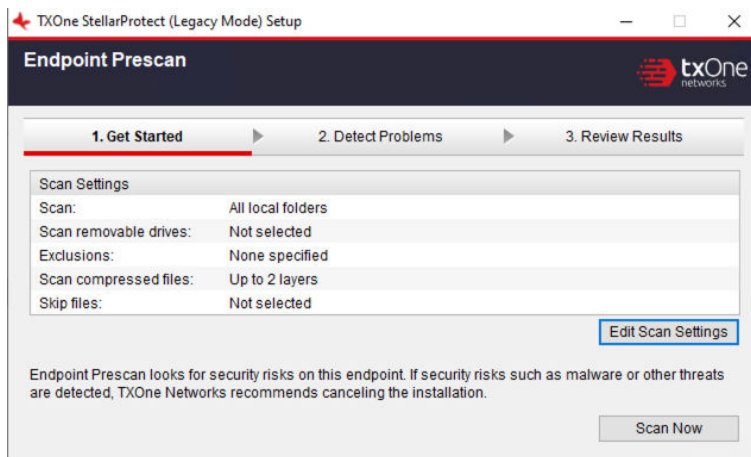

**Note**

If you set the `FORCE_PRESCAN` value to 1 in the `StellarSetup.ini` configuration file:

- The **Do Not Scan** and close buttons will not be available.
- You cannot stop the scan process after selecting **Scan**.

See [Properties in the Config File on page 2-7](#) for more information.

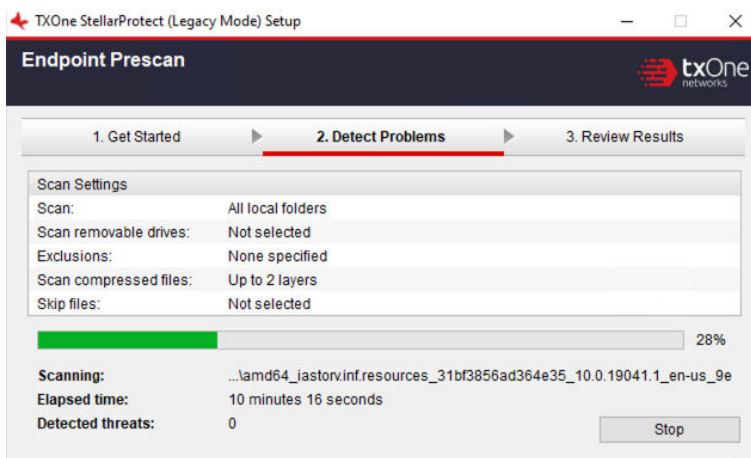

- To skip scanning, click **Do Not Scan**.
- To scan the endpoint for threats, click **Scan**.
  - a. The **Endpoint Prescan** window appears.

**FIGURE 2-27. Endpoint Prescan - Get Started**

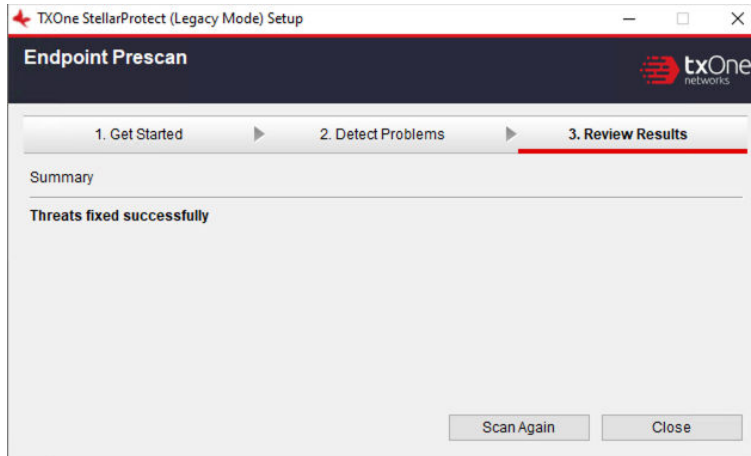

- b. (Optional) To customize the scan settings, click **Edit Scan Settings**.

- c. Click **Scan Now**. The **Detect Problems** window appears indicating the StellarProtect (Legacy Mode) is performing the prescan.

**FIGURE 2-28. Endpoint Prescan - Detect Problems**

- d. After the prescan is completed, the **Review Results** window appears. Click **Close**.

**FIGURE 2-29. Endpoint Prescan - Review Results**

If **Endpoint Prescan** detects security risks, TXOne Networks recommends canceling the installation. Remove threats from the endpoint and try again. If critical programs are detected as threats, confirm that the endpoint is secure and that the versions of the programs installed do not contain threats.

Ignore detected threats only if you are absolutely certain that they are false positives.

**Tip**

Perform a manual scan to detect and remove threats on the endpoint. See *Manual Scan Commands* in the *StellarProtect Administrator's Guide* for more information.

---

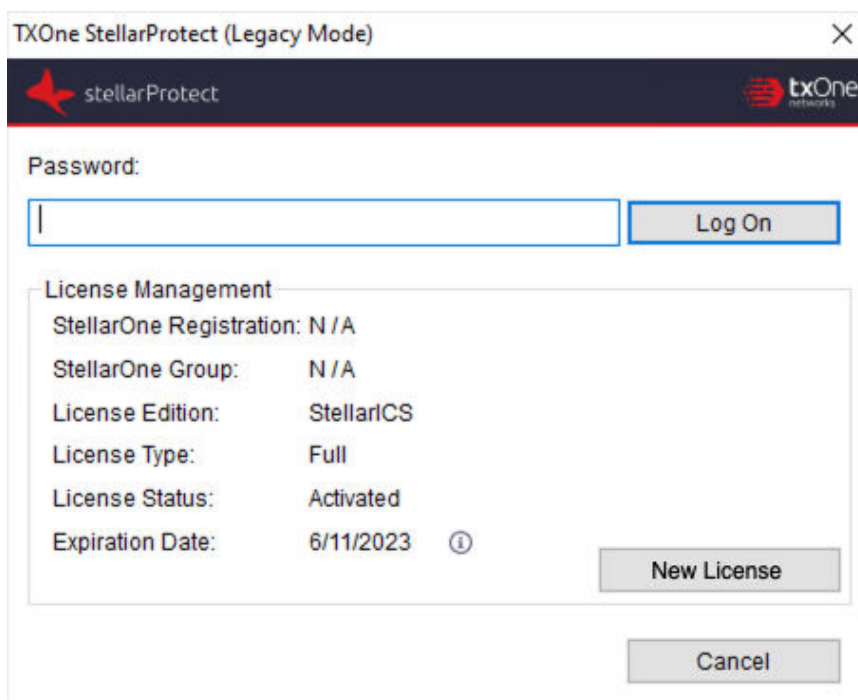

10. When the **Installation Complete** window displays, click **Finish**.

**Note**

Optionally enable memory randomization on older operating systems such as Windows XP or Windows Server 2003, which may lack or offer limited Address Space Layout Randomization (ASLR) support. See *Exploit Prevention* settings in the *StellarProtect Administrator's Guide* for more information.

11. Run StellarProtect (Legacy Mode) and log on with your password.

**FIGURE 2-30. Log On StellarProtect (Legacy Mode)**

12. Upon logging on StellarProtect (Legacy Mode) successfully, the **Overview** window will display.

### 13. Configure the new installation.

#### a. Set up the Approved List.

Before TXOne StellarProtect (Legacy Mode) can protect the endpoint, it must check the endpoint for existing applications and files necessary for the system to run correctly.

See [Setting Up the Approved List on page 2-74](#) for detailed instructions.

#### b. Modify the TXOne StellarProtect (Legacy Mode) settings. See *TXOne StellarProtect Administrator's Guide* for more information.

---

## Setting Up the Approved List

Before TXOne StellarProtect or StellarProtect (Legacy Mode) Application Lockdown feature can protect the endpoint, it must check the endpoint for existing applications and files necessary for the system to run correctly.

The following instructions take StellarProtect (Legacy Mode) as an example for how to set up the Approved List for StellarProtect (Legacy Mode) or StellarProtect agent. StellarProtect would require you to follow similar procedures with slight differences in the GUI.

### Note

If you choose not to create the Approved List during the StellarProtect installation process, refer to the following procedures to perform the task.

---

## Procedure

1. Open the StellarProtect (Legacy Mode) console. The StellarProtect (Legacy Mode) log on screen appears.
2. Provide the password and click **Log On**.

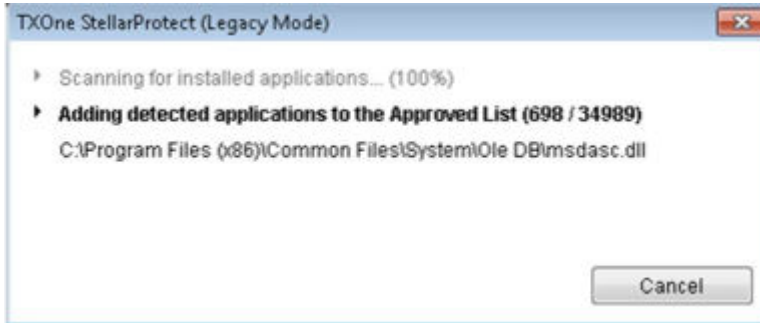

**FIGURE 2-31. StellarProtect (Legacy Mode) Log On Screen**

3. StellarProtect (Legacy Mode) asks if you want to set up the Approved List now.

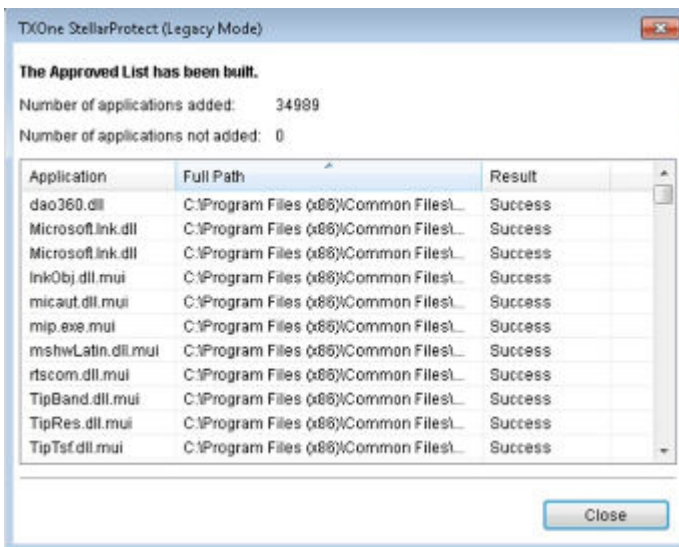

**FIGURE 2-32. The Approved List is Empty**

- At the notification window, select **Yes. Set up the Approved List now** and click **OK**. StellarProtect (Legacy Mode) scans the endpoint and adds all applications to the Approved List.

**FIGURE 2-33. Scanning for Creating Approved List**

- StellarProtect (Legacy Mode) displays the Approved List Configuration Results.

**FIGURE 2-34. Approved List Created**

**Note**

- When TXOne StellarProtect/StellarProtect (Legacy Mode) Application Lockdown is enabled, only applications that are in the Approved List will be able to run. See Administrator's Guide for more information.
  - When the endpoint is creating or updating its Approved List, no policy settings can be deployed.
- 

**6. Click Close.**

---

## Silent Installation

StellarProtect/StellarProtect (Legacy Mode) provides the silent installation based on a pre-defined setup configuration file. You can customize the configuration settings in the `StellarSetup.ini` file to enable silent installation, and then execute `StellarSetup.exe` in silent mode by double-clicking the installer or via the command line interface (CLI).

Topics in this section include:

- [An Example of Setup Config File Adapted for Silent Installation on page 2-77](#)
- [Executing Silent Installation on page 2-84](#)

### An Example of Setup Config File Adapted for Silent Installation

See below as an example of the setup configuration file (`StellarSetup.ini`) adapted for installing agents in StellarOne managed and silent modes. You can define your own setup config file by changing the values for different installation requirements.

**Note**

- The example of the defined setup config file uses **license file** for product activation.
  - To run silent installation, ensure the values of the following properties are specified:
    - [Shared\_license]
      - product\_serial\_number
      - txone\_license\_file
    - [shared\_install]
      - silent
      - password
  - If you would like to use a proxy server for communication with StellarOne, configure the `shared_proxy` properties as well.
- 

**An example of the setup config file adapted for silent installation**

```
[shared_license]
product_serial_number = TExxxxxx-SAMP-LEXX-XXXX-TXONESPXXXXX
txone_license_file = Stellar<License>Edition_XXXXXXXXXXXXXXXX.txt
txone_license_env = prod

```

---

**Note**

- The license file name varies depending on different license editions (ICS/Kiosk/OEM). For example, if you use ICS license edition, the license file name appears like this: `StellarICSEdition_XXXXXXXXXXXX.txt`.
  - To get the license file and product serial number, see [Getting the License File and PSN on page 2-92](#).
- 

## Executing Silent Installation

After defining the setup configuration file, execute the silent installation on the endpoint.

---

### Procedure

1. If the agent installer package is downloaded from StellarOne, within the `StellarSetup.ini` config file, almost all the values needed should be automatically generated. If no additional configuration requirements are needed, you can just change the `silent` value to 1 and specify the password in the `[shared_install]` section of the configuration file.
- 

**Note**

If the agent installer package is downloaded from the Software Download Center, you should also specify the license data for the installer to launch.

---

2. Locate the defined `StellarSetup.ini` file in the installation package.
3. Choose one of the methods to launch the `StellarSetup.exe` installer.
  - Double-click the installer `StellarSetup.exe`.
  - Use the command prompt to execute `StellarSetup.exe` with the argument `-s`, e.g., type `C:\package>StellarSetup.exe -s`

**Note**

To view relevant information or progress status of the silent installation, check logs filed under `C:\Windows\Temp`.

---

4. Run `StellarProtect` or `StellarProtect (Legacy Mode)` and log on with the configured password.
  5. After successfully logging into `StellarProtect` or `StellarProtect (Legacy Mode)`, the **Overview** window will be displayed.
- 

## Installation Using the Command Line

Administrators can also install `StellarProtect/StellarProtect (Legacy Mode)` from the command line interface (CLI) or using a batch file, allowing for silent installation and mass deployment.

### Installer Command Line Interface Parameters

The following table lists the command parameters available for `StellarProtect` or `StellarProtect (Legacy Mode)` installation.

**TABLE 2-4. StellarProtect Installer Command Line Options**

PARAMETER	VALUE	DESCRIPTION
-s		<p>Run the installer silently</p> <hr/> <p> <b>Note</b>            During the installation process, you can view the following log files in the folder C:\windows\temp to check the status of the prescan and initial approved process:</p> <p>StellarProtect            \StellarProtectPrescan_YYYYMMDD.            log</p>
-e		Encrypt the config file for installation

**TABLE 2-5. StellarProtect (Legacy Mode) Installer Command Line Options**

PARAMETER	VALUE	DESCRIPTION
-s		<p>Run the installer silently</p> <hr/> <p> <b>Note</b>            During the installation process, you can view the following log files in the folder C:\windows\temp to check the status of the prescan and initial approved process:</p> <ul style="list-style-type: none"> <li>• Prescan process:              YYYYMMDDHHMSS_wk_PreScanProgress.log</li> <li>• Initial approved process:              YYYYMMDDHHMSS_wk_InitListProgress.log</li> </ul>

PARAMETER	VALUE	DESCRIPTION
-p	<administrator_password>	Specify the administrator password
-d	<path>	Specify the installation path
-nd		Do not create a desktop shortcut
-ns		Do not add a shortcut to the <b>Start</b> menu
-ni		Hide the task tray icon
-cp	<path>	Specify the StellarProtect (Legacy Mode) configuration file  <div style="border: 1px solid black; padding: 5px;">  <b>Note</b>            The StellarProtect (Legacy Mode) configuration file can be exported after installing StellarProtect (Legacy Mode).         </div>
-lp	<path>	Specify the Approved List  <div style="border: 1px solid black; padding: 5px;">  <b>Note</b>            After installing StellarProtect (Legacy Mode) and creating the Approved List, the list can be exported.         </div>
-qp	<path>	Specify the folder path for quarantined files when custom action is set to “quarantine” mode
-nps		Do not execute Prescan
-ips		Do not cancel installation when Prescan detects threats

An example of using CLI for silent installation without creating a desktop shortcut would look like this:

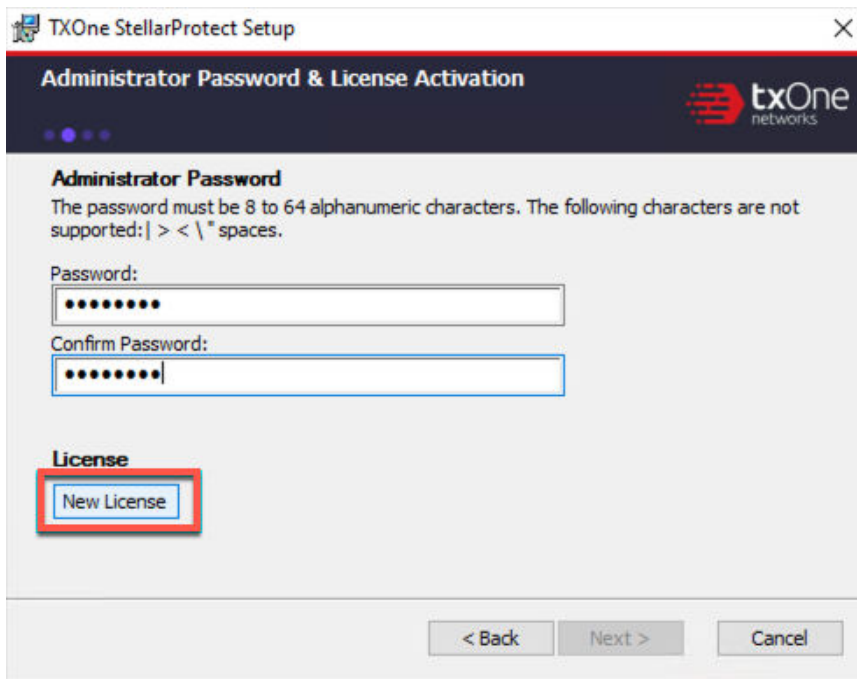

```
StellarSetup.exe -s -p <administrator_password> -nd
```

## License Activation for Standalone Agent

This section describes the license activation procedures during the installation process for standalone StellarProtect/StellarProtect (Legacy Mode) agents.

### Procedure

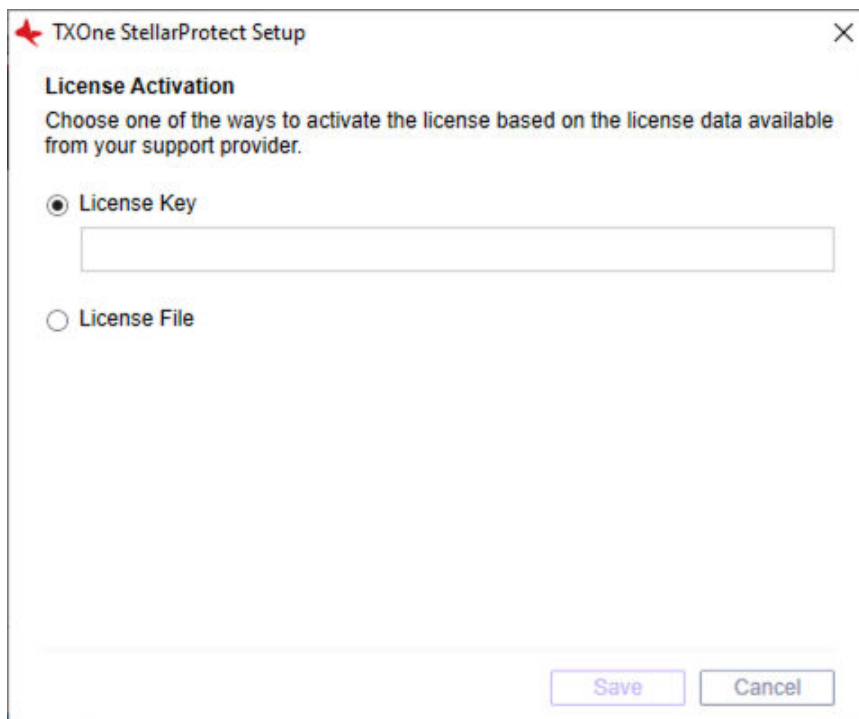

1. Launch the agent's Installer and go through the procedures until the **Administrator Password & License Activation** window appears. After inputting and confirming the administrator password, click the **New License** button.

**FIGURE 2-35. License Activation - New License Button**

2. A pop-up **License Activation** window appears.

**FIGURE 2-36. License Activation - License Key or License File**

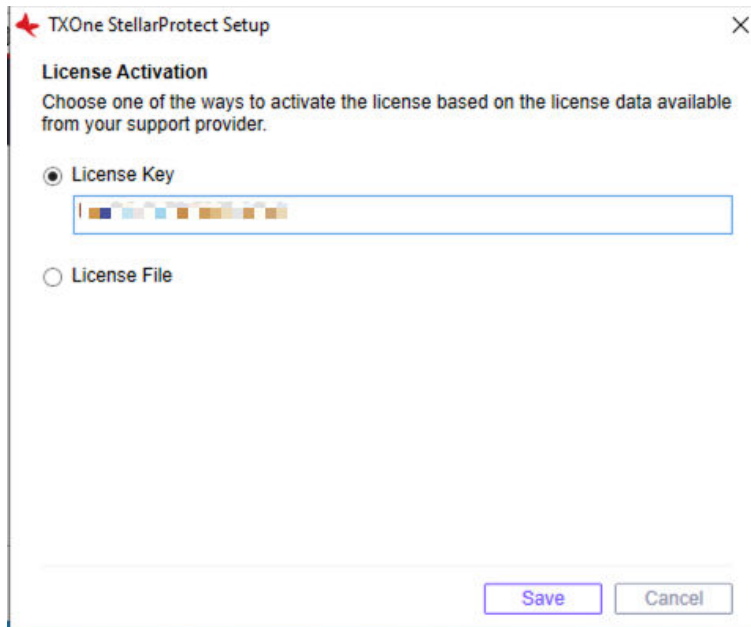

3. StellarProtect/StellarProtect (Legacy Mode) recognizes two license formats (**License Key** and **Activation Code**) available from different sales channels. See the following table first to find the license format that matches the given license data.

**TABLE 2-6. Comparison of Two Different License Formats**

	<b>LICENSE KEY</b>	<b>ACTIVATION CODE</b>
Length	19 characters	37 characters
Example	FIJN-HPYB-XXXX-XXXX	TE-24RF-Q9UN9-S9QQN-XXXXX-XXXXX-XXXXX

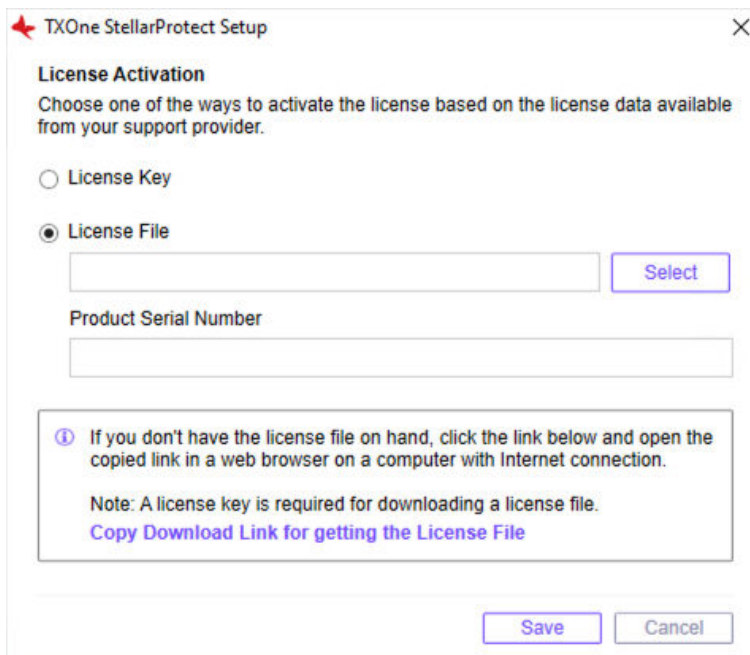

4. See the following instructions for how to activate license depending on the different license formats.

- If the given license format is **Activation Code**:
  - a. Click **License Key**.
  - b. Specify the **Activation Code** in the text field.

- c. Click **Save**.
- If the given license format is **License Key**:
    - Use the License Key to download the License File (a .txt file). See [Getting the License File and PSN on page 2-92](#) for instructions.
    - After getting the License File, click **License File** and import it.

- Specify the **Product Serial Number** in the text field.

The screenshot shows a dialog box titled "TXOne StellarProtect Setup" with a close button in the top right corner. The main heading is "License Activation" with the instruction: "Choose one of the ways to activate the license based on the license data available from your support provider." There are two radio button options: "License Key" (unselected) and "License File" (selected). Below the "License File" option is a text input field and a "Select" button. Below that is a "Product Serial Number" label and another text input field. A help box contains an information icon, the text "If you don't have the license file on hand, click the link below and open the copied link in a web browser on a computer with Internet connection.", a note "Note: A license key is required for downloading a license file.", and a blue link "Copy Download Link for getting the License File". At the bottom right are "Save" and "Cancel" buttons.

**FIGURE 2-37. License Activation - License File**

- Click **Save**.
5. A success message appears. Click **Next** to proceed to the next procedure for the installation.

**Note**

- See *Resolving Licensing Issues on page 2-100* if licensing related error messages appear.
- See *Attended Installation of StellarProtect on page 2-42* or *Attended Installation of StellarProtect (Legacy Mode) on page 2-62* for the next step of installing StellarProtect or StellarProtect (Legacy Mode).

## Getting the License File and PSN

This section describes two methods to get the license file and PSN (product serial number):

- *Getting the License File and PSN for Standalone Agents on page 2-92*
- *Getting the Latest License File from StellarOne on page 2-99*

## Getting the License File and PSN for Standalone Agents

To activate licenses for certain standalone agents, follow the instructions below.

---

### Procedure

1. Open the URL: <https://mytxone.cs.txone.com/license/activate/txone/stellar> in a web browser on a computer with Internet connection.

**Note**

This URL can also be obtained during the installation process with GUI. See *About the Download Link for Getting License File on page 2-95* for more details.

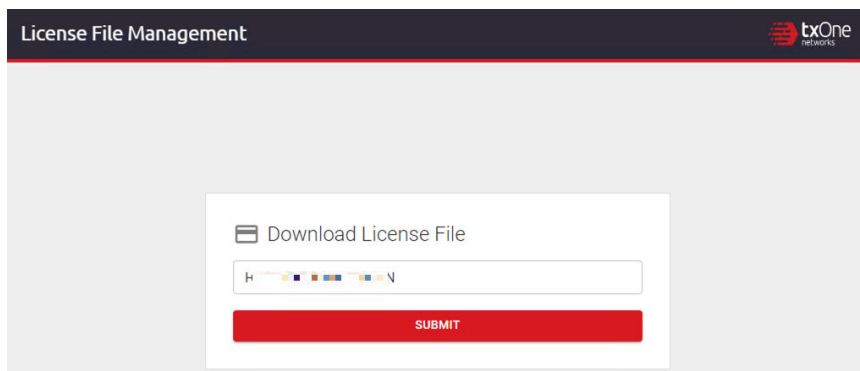

---

**Important**

A license key is required for downloading a license file.

---

2. You will be directed to the **License File Management** web page. Specify your license key in the **License Key** field.

**FIGURE 2-38. License File Management**

3. Click **SUBMIT**.
4. The **License File Info** pop-up window appears showing the license information. Check if the information listed matches the license data provided by your support provider.
5. Click the copy icon to copy and save the **Product Serial Number** for later use.

### License File Info

License Type —  
Full

License Edition —  
Stellar ICS Edition

Seats —  
10

Expiration —  
2023-12-09

License Key —  
[Redacted]

Product Serial Number —  
[Redacted] 

Please copy this value to your device

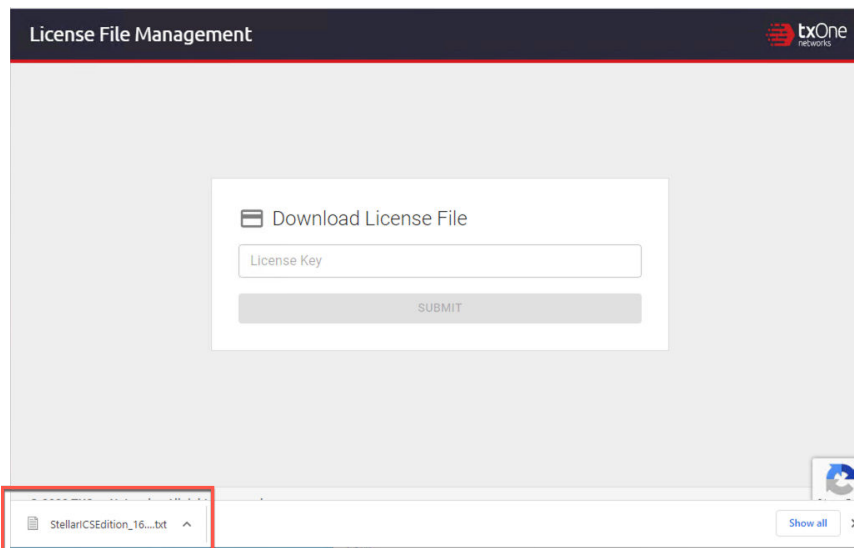

[DOWNLOAD](#) [CLOSE](#)

**FIGURE 2-39. License Information**

**Important**

The **Product Serial Number** is required for license activation by importing a license file. Ensure that you save it for later use.

6. Click **Download** for downloading the license file (a .txt file).

**FIGURE 2-40. License File Downloaded**

**Note**

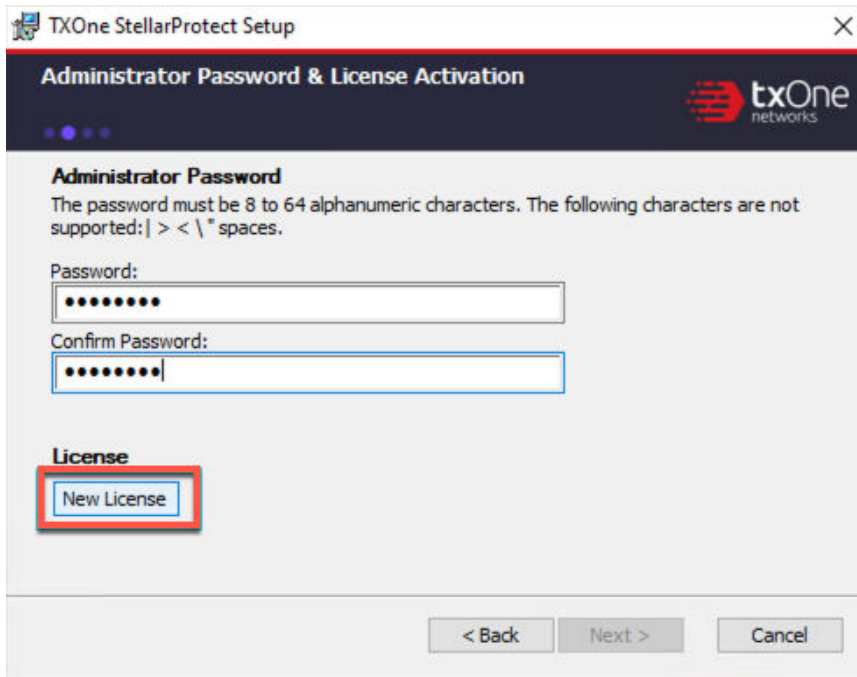

Please find the license file in the downloads folder.

### About the Download Link for Getting License File

Users can also copy the URL of TXOne **License File Management** web page during the installation process with GUI.

## Procedure

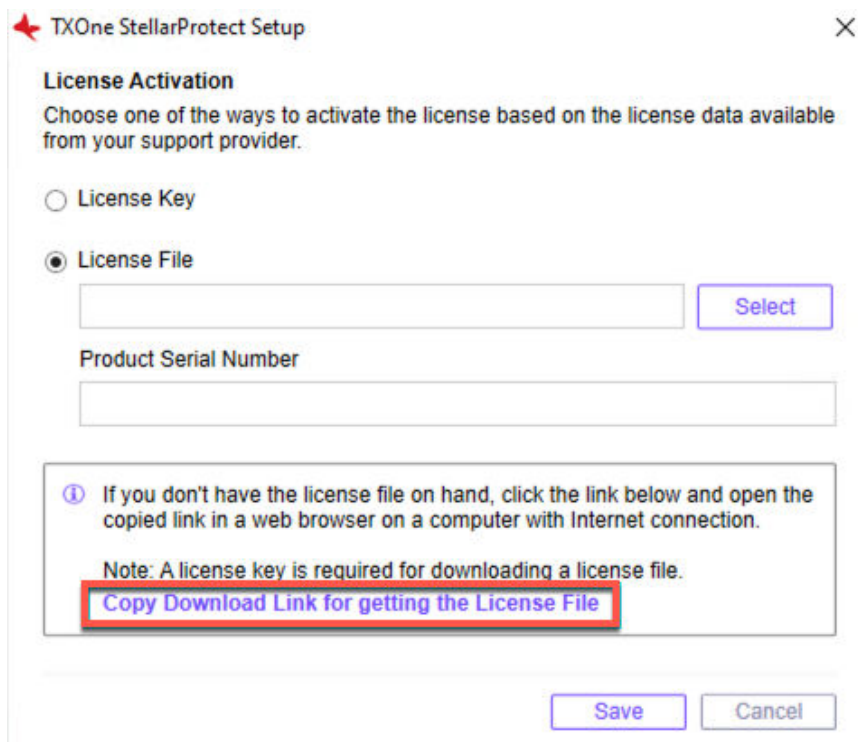

1. Launch the agent's GUI Installer and go through the procedures until the **Administrator Password & License Activation** window appears. After specifying the administrator password, click the **New License** button.

**FIGURE 2-41. License Activation - New License Button**

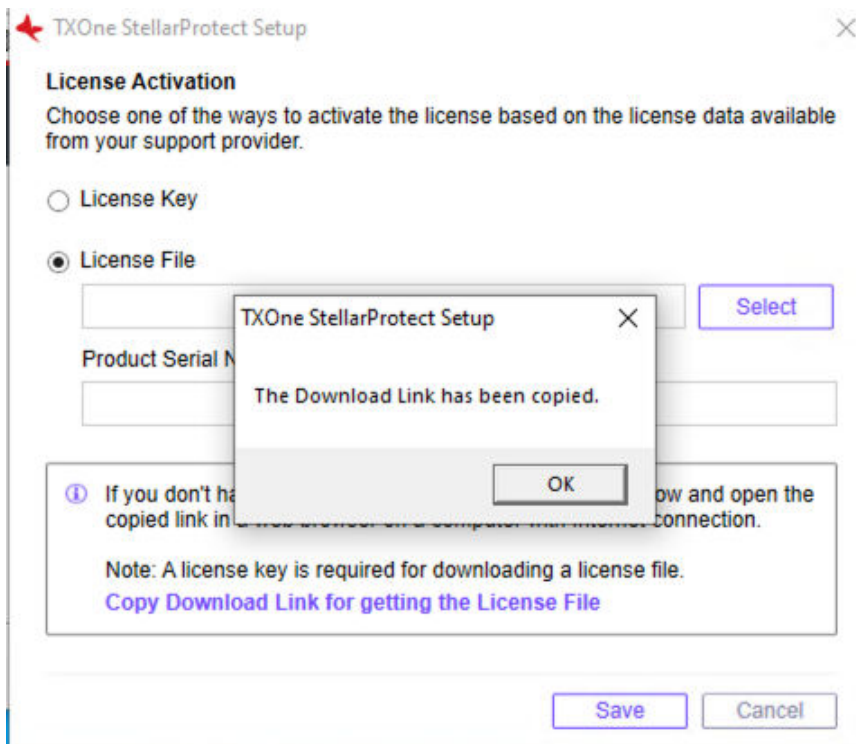

2. A pop-up **License Activation** window appears. Select **License File**.
3. Click **Copy Download Link for getting the License File** at the bottom of the **License Activation** window.

**FIGURE 2-42.** Copy the Download Link

4. **The Download Link has been copied** message appears.

**FIGURE 2-43. Download Link Copied**

5. Open the copied link in a web browser on a computer with Internet connection. You will be directed to TXOne **License File Management** website.

**Note**

See [Getting the License File and PSN for Standalone Agents on page 2-92](#) for instructions on how to get the license file from TXOne **License File Management** website.

## Getting the Latest License File from StellarOne

When you use a license file for activating certain agents with the installer package downloaded from StellarOne, if a license expiration error message appears, follow the instructions below to get the latest license file and PSN (Product Serial Number) from StellarOne.

### Procedure

1. To get the latest license file, go to StellarOne **Administration** > **License**.
2. Click **Download the latest license file** at the bottom of the **License** page.

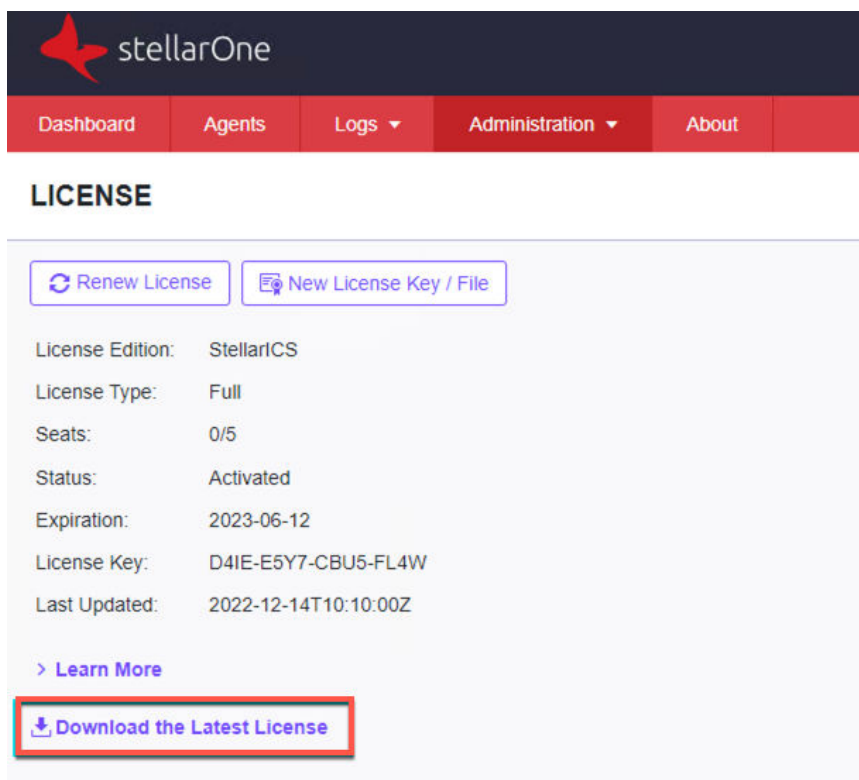

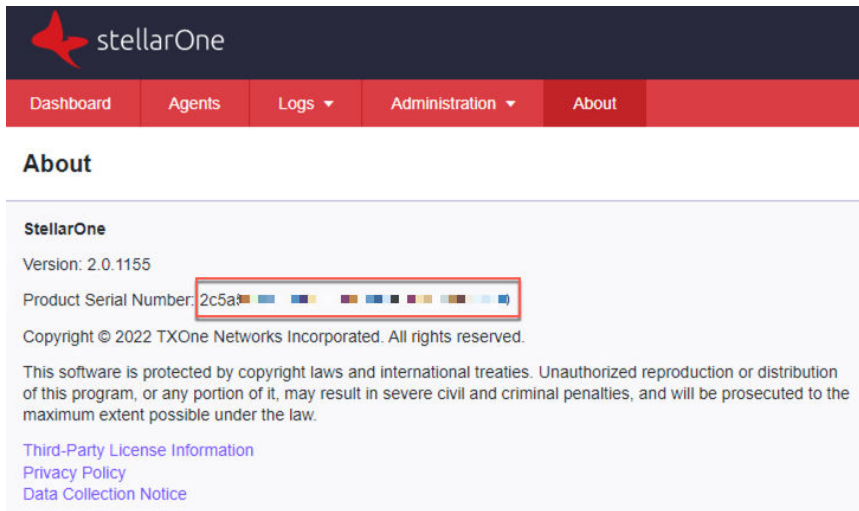

FIGURE 2-44. Download License File from StellarOne

3. The license file (a .txt file) has been downloaded to your Downloads folder.
4. To get the PSN, go to StellarOne **About** page.
5. Find and copy the product serial number.

**FIGURE 2-45. Get Product Serial Number from StellarOne**

## Resolving Licensing Issues

The following table provides more information about some licensing error messages and possible actions to take when issues occur during license activation.

**TABLE 2-7. Licensing Error Messages and Suggested Actions**

ERROR MESSAGE	DESCRIPTION	POSSIBLE ACTIONS
<p>Unable to convert the license from full to trial version. To continue using the product, please contact your sales representative for renewing the license.</p>	<p>Once upgraded to a full license, the full license cannot be converted to a trial license.</p>	<ul style="list-style-type: none"> <li>• Ensure you enter the valid full license data.</li> <li>• Contact your sales representative for renewing the full license.</li> </ul>
<p><b>Activation Code</b> detected as the currently used license format. This trial license can only be used once. Please contact your sales representative for a trial <b>License Key</b> or upgrading to a full license.</p>	<p>Based on the terms and conditions, the trial <b>Activation Code</b> can only be used once.</p> <p>An example of the <b>Activation Code</b>: TE-24RF-Q9UN9-S9QQN-XXXXX-XXXXX-XXXXX</p>	<p>To continue using the product, contact your sales representative for a trial <b>License Key</b> or upgrading to a full license.</p>
<p><b>License Key</b> detected as the currently used license format. Please contact your sales representative for extending the license.</p>	<p>Based on the terms and conditions, the trial <b>License Key</b> can be extended under certain circumstances.</p> <p>You can also choose to upgrade to a full license for a minimum period of one-year protection coverage.</p> <p>If you're using a full license, consider renewing the license.</p> <p>An example of the <b>License Key</b>: FIJN-HPYB-XXXX-XXXX</p>	<p>To continue using the product, contact your sales representative for extending the trial license, upgrading to a full license, or renewing the full license.</p>

## Replicating Installation Configuration for Multiple Standalone Agents

This section introduces a more efficient method to replicate installation configuration for multiple standalone agents with the same license file and product serial number.

---

### Procedure

1. See [Getting the License File and PSN for Standalone Agents on page 2-92](#) for getting the license file and product serial number.
  2. Place the license file as the top-level file in the agent's installer package.
  3. Prepare your `StellarSetup.ini` config file used for installing agents in standalone and silent modes.
- 

#### Note

- Ensure the values of the following properties are specified:
    - [Shared\_license]
      - product\_serial\_number
      - txone\_license\_file
    - [shared\_install]
      - silent
      - password
- 

4. Save the installer package in the target endpoints for installation.
  5. Launch the Installer in silent mode.
- 

## Proxy Settings

If StellarProtect/StellarProtect (Legacy Mode) agents use a proxy server for both communication with StellarOne and scan component updates, it is

configurable using `StellarSetup.ini` before installation and the command line interface afterwards.

- For more information about using `StellarSetup.ini` to configure the proxy settings before installation, see [Setup Configuration File on page 2-5](#)
- For more information about using command line interface to configure the proxy settings after installation, see *TXOne StellarProtect Administrator's Guide* for the list of all commands.

# Chapter 3

## Agent Configuration File Deployment

This chapter describes the deployment of customized settings to multiple TXOne StellarProtect/StellarProtect (Legacy Mode) agents using an Agent Configuration File.

For mass deployment, TXOne Networks recommends first installing StellarProtect or StellarProtect (Legacy Mode) on a test endpoint to confirm the correct operation of all parameters, since a customized configuration may require a valid agent configuration file and Approved List.

**Note**

Refer to *TXOne StellarProtect Administrator's Guide* for more information about the Approved List and agent configuration file.

---

## Deployment for Standalone Agents

Agents installed in **Standalone** mode are not managed by a TXOne StellarOne central management console server. To manually deploy a single configuration to multiple **Standalone** agents, import the sample config file to the target agents.

Two alternative configuration deployment methods are available:

- Without using the GUI: Use the `StellarSetup.ini` file
  - For StellarProtect, find the `import_source` property in the `[protect_client]` section in the `StellarSetup.ini` file, and then specify the path to the folder containing the sample config file. See [Properties in the Config File on page 2-7](#) for more details.
  - For StellarProtect (Legacy Mode), manually add the `CONFIG_PATH` property in the `StellarSetup.ini` file, and then specify the file path to the sample config file. See [Hidden Properties in the Config File on page 2-33](#) for more details.
- With the GUI: See the following instructions on how to use the **Export/Import Settings** buttons on the agent console

### Note

Only StellarProtect (Legacy Mode) supports exporting/importing settings via the agent console GUI.

---

### Procedure

1. Open the agent console using the desktop icon (if available) or the **Start** menu by clicking **All Programs > TXOne StellarProtect (Legacy Mode)**.
2. Provide the password and click **Log On**.
3. Click the **Settings** menu item to access the **Export/Import Settings** section.
  - To export the configuration file as a database (.xen) file:

- a. Click **Export Settings**, and choose the location to save the file.
- b. Provide a filename, and click **Save**.

**Note**

TXOne Networks encrypts the configuration file before export. Users must decrypt the configuration file before modifying the contents.

---

- To import the configuration file as a database (.xen) file:
    - a. Click **Import Settings**, and locate the database file.
    - b. Select the file, and click **Open**.
4. StellarProtect (Legacy Mode) overwrites the existing configuration settings with the settings in the database file.
- 

## Deployment Using StellarOne

Agents installed in **Managed** mode are managed by a StellarOne server, which can issue remote commands to all managed agents. To deploy agent configuration settings to multiple managed agents, launch the StellarOne web console and use the **Send Command** menu located on the **Agent** management screen.

You can remotely obtain agent configuration settings and Approved List by exporting and downloading them from the StellarOne.

**Note**

Only StellarProtect (Legacy Mode) supports exporting/importing agent configuration settings and importing Approved List.

---

### Procedure

1. Click **Agents > StellarProtect (Legacy Mode)** from the StellarOne web console. The **Agent** management screen appears.

2. Select the target endpoint(s).
3. Click **Import/ Export** and select one of the following:
  - **Export Approved List**
  - **Export Agent Configuration**

The StellarOne will issue the command. Progress can be viewed from the pop-up **Details** window.

4. To import settings, repeat the above steps, instead selecting either **Import Approved List** or **Import Agent Configuration**.
  5. A **Command Deployment** window appears showing the exports status.
  6. Click **Download** to download the exported settings.
- 

## Remotely Importing Agent Settings

You can remotely apply new agent settings to agents from StellarOne. This feature allows you to:

- Remotely overwrite agent configurations
- Remotely overwrite Approved Lists
- Remotely add approved items to Approved Lists

### Note

Only StellarProtect (Legacy Mode) supports this function.

---

## Procedure

1. Prepare a customized agent configuration file or Approved List.
  - a. Export and download an agent configuration file or Approved List.
  - b. Customize the downloaded file.

**Note**

To ensure successful import, verify that the file to import meets the following requirements:

- File is in the CSV format and uses UTF-8 encoding
  - For Approved List, maximum file size supported is 20 MB
  - For agent configuration file, maximum file size supported is 1 MB
- 

2. Click **Agents** from the StellarOne console. The **Agent management** screen appears.
  3. To import the customized file to agents, follow the steps below.
    - a. From the Endpoint column, select one or more agents.
    - b. Click **Import/ Export**
    - c. Select **Import Approved List** or **Import Agent Configuration**. The import dialog will appear.
  4. To import the customized file to an agent group, follow the steps below.
    - a. From the left panel, select an agent group and go to **Import / Export**.
    - b. Select **Import Approved List** or **Import Agent Configuration**. The import dialog will appear.
  5. By default, StellarOne does the following:
    - **Approved List:** accumulates items from the customized Approved List to the target Approved Lists. To replace the target Approved Lists with the customized Approved List, select **Overwrite the existing Approved List**.
    - **Agent Configuration:** overwrites the target Approved Lists with the customized Approved List.
  6. Click **Browse** to select the customized file.
  7. Click **OK**.
-

# Chapter 4

## Upgrade

This chapter describes how to upgrade the StellarProtect and StellarProtect (Legacy Mode) agents by installing patches.

Topics in this chapter include:

- *Supported Upgrade Paths on page 4-2*
- *Preparing the Agent for Upgrade to a Later Version on page 4-4*

## Supported Upgrade Paths

The following tables illustrate the supported upgrade paths for StellarProtect and StellarProtect (Legacy Mode) agents.

**TABLE 4-1. Supported Upgrade Paths for StellarProtect**

<b>CURRENT VERSION</b>	<b>SUPPORTED TARGET UPGRADE VERSION</b>	<b>LOCAL UPGRADE</b>	<b>REMOTE UPGRADE</b>
3.1	3.1 Patch 1	√	√
3.0 Service Pack 1	3.1 / 3.1 Patch 1	√	√
3.0	3.0 Service Pack 1 / 3.1 / 3.1 Patch 1	√	√
2.2	3.0 / 3.0 Service Pack 1 / 3.1 / 3.1 Patch 1	√	√
2.1	2.2 / 3.0 / 3.0 Service Pack 1 / 3.1 / 3.1 Patch 1	√	√
2.0	2.1 / 2.2 / 3.0 / 3.0 Service Pack 1 / 3.1 / 3.1 Patch 1	√	√
1.2 Patch 1	2.0 / 2.1 / 2.2 / 3.0 / 3.0 Service Pack 1 / 3.1 / 3.1 Patch 1	√	√
1.2	1.2 Patch 1 / 2.0 / 2.1 / 2.2 / 3.0 / 3.0 Service Pack 1 / 3.1 / 3.1 Patch 1	√	√
1.1	1.2 / 1.2 Patch 1 / 2.0 / 2.1 / 2.2 / 3.0 / 3.0 Service Pack 1 / 3.1 / 3.1 Patch 1	√	√
1.0	1.1 / 1.2 / 1.2 Patch 1 / 2.0 / 2.1 / 2.2 / 3.0 / 3.0 Service Pack 1 / 3.1 / 3.1 Patch 1	√	N/A

**TABLE 4-2. Supported Upgrade Paths for StellarProtect (Legacy Mode)**

<b>CURRENT VERSION</b>	<b>SUPPORTED TARGET UPGRADE VERSION</b>	<b>LOCAL UPGRADE</b>	<b>REMOTE UPGRADE</b>
3.1	3.1 Patch 1	√	√
3.0 Service Pack 1	3.1 / 3.1 Patch 1	√	√
3.0	3.0 Service Pack 1 / 3.1 / 3.1 Patch 1	√	√
1.5	3.0 / 3.0 Service Pack 1 / 3.1 / 3.1 Patch 1	√	√
1.4	1.5 / 3.0 / 3.0 Service Pack 1 / 3.1 / 3.1 Patch 1	√	√
StellarProtect (Legacy Mode) 1.3	1.4 / 1.5 / 3.0 / 3.0 Service Pack 1 / 3.1 / 3.1 Patch 1	√	√
1.2 Patch 1	StellarProtect (Legacy Mode) 1.3 / 1.4 / 1.5 / 3.0 / 3.0 Service Pack 1 / 3.1 / 3.1 Patch 1	√	√
1.2	1.2 Patch 1	√	√
1.1	1.2 / 1.2 Patch 1	√	√
StellarEnforce 1.0	1.1 / 1.2 / 1.2 Patch 1	√	N/A

**Note**

- The StellarEnforce was renamed StellarProtect (Legacy Mode) upon the release of version 1.3.
  - To directly upgrade StellarEnforce/StellarProtect (Legacy Mode) from versions below 1.2 Patch 1 to versions older than 1.2 Patch1, add the patch file hash as the trusted hash and enable the PTU function before executing the upgrade.
- 

## Preparing the Agent for Upgrade to a Later Version

See the following table for the appropriate actions to take according to your chosen installation method.

---

**Note**

- The latest updates can be downloaded from the StellarProtect [Software Download Center](#).
  - Before upgrading, close the StellarProtect or StellarProtect (Legacy Mode) agent console and/or wksupporttool UI, and check the [Supported Upgrade Paths on page 4-2](#) for StellarProtect or StellarProtect (Legacy Mode).
- 

**WARNING!**

- If the agents are managed by StellarOne, ensure you upgrade the StellarOne server first before upgrading the StellarProtect or StellarProtect (Legacy Mode) agents.
  - Do not register StellarProtect (Legacy Mode) 3.0 to StellarOne 2.2 or older versions.
-

**TABLE 4-3. Post-Installation Agent Upgrade**

<b>INSTALLATION METHOD</b>	<b>REQUIRED ACTION</b>	<b>SETTINGS RETAINED</b>
Local upgrade	<p><b>StellarProtect:</b></p> <p>Extract the patch zip file and deploy patching by running txone_sp_full_patch_win_en.exe.</p>	Compatible settings retained
	<p><b>StellarProtect (Legacy Mode):</b></p> <p>Extract the patch zip file and deploy patching by running txone_splm_full_patch_win_en.exe.</p>	Compatible settings retained
Remote upgrade	<p>See the <i>StellarOne Administrator's Guide</i> for how to deploy patches to the agents remotely.</p> <hr/> <p> <b>Note</b></p> <p>TXOne Networks recommends using StellarOne 2.0 console or above to remotely deploy patches to the managed agents.</p> <hr/>	Compatible settings retained

# Chapter 5

## License Renewal

This chapter describes how to renew license for standalone StellarProtect or StellarProtect (Legacy Mode) agent.

## License Renewal for Standalone Agents

For standalone agents, users can renew the license directly on the agent console.

**Note**

For StellarProtect or StellarProtect (Legacy Mode) agents managed by StellarOne server, please renew license via the StellarOne web console. Refer to *StellarOne Administrator's Guide* for detailed instructions.

---

The following instructions take StellarProtect as an example for how to renew license for standalone StellarProtect or StellarProtect (Legacy Mode) agents. StellarProtect (Legacy Mode) would require you to follow similar procedures with slight differences in the GUI.

StellarProtect/StellarProtect (Legacy Mode) recognizes two license formats (**License Key** and **Activation Code**) available from different sales channels. See the following table first to find the license format that matches the given license data.

**TABLE 5-1. Comparison of Two Different License Formats**

	<b>LICENSE KEY</b>	<b>ACTIVATION CODE</b>
Length	19 characters	37 characters
Example	FIJN-HPYB-XXXX-XXXX	TE-24RF-Q9UN9-S9QQN-XXXXX-XXXXX-XXXXX

---

### Procedure

1. Click the **New License** button on the StellarProtect logon screen.

TXOne StellarProtect

stellarProtect

txOne networks

Password

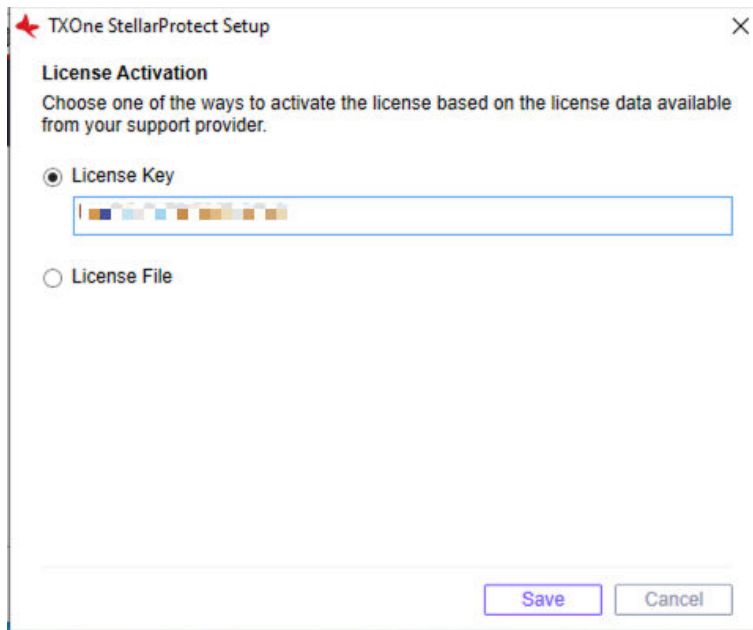

**Information**

StellarOne Registration:	N/A
StellarOne Group Name:	N/A
License Edition:	StellarICS
License Type:	Full
License Status:	Activated
Expiration Date:	2021-12-31 ⓘ

**FIGURE 5-1. Renew License for Standalone Agents**

2. A pop-up **License Activation** window appears.
3. See the following instructions for how to activate license depending on the different license formats.
  - If the given license format is **Activation Code**:
    - a. Click **License Key**.

- b. Specify the **Activation Code** in the text field.

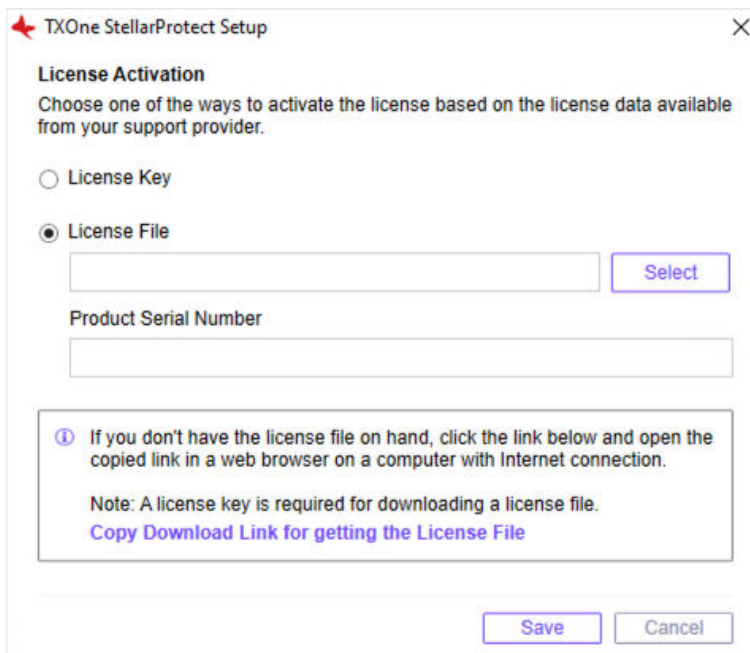

- c. Click **Save**.

- If the given license format is **License Key**:
  - Use the License Key to download the License File (a .txt file). See [Getting the License File and PSN on page 2-92](#) for instructions.
  - After getting the License File, click **License File** and import it.

- Specify the **Product Serial Number** in the text field.

The screenshot shows a dialog box titled "TXOne StellarProtect Setup" with a close button (X) in the top right corner. The main heading is "License Activation" with the instruction: "Choose one of the ways to activate the license based on the license data available from your support provider." There are two radio button options: "License Key" (unselected) and "License File" (selected). Below the "License File" option is a text input field and a "Select" button. Below that is a "Product Serial Number" label and another text input field. A help box contains an information icon (i) and the text: "If you don't have the license file on hand, click the link below and open the copied link in a web browser on a computer with Internet connection." Below this is a "Note: A license key is required for downloading a license file." and a blue hyperlink: "Copy Download Link for getting the License File". At the bottom right of the dialog are "Save" and "Cancel" buttons.

# Chapter 6

## Uninstalling StellarProtect/ StellarProtect (Legacy Mode)

Follow the instructions to uninstall StellarProtect or StellarProtect (Legacy Mode).

### Note

StellarProtect or StellarProtect (Legacy Mode) administrator password is required to uninstall StellarProtect or StellarProtect (Legacy Mode) from an endpoint.

---

### Important

Please make sure the StellarProtect or StellarProtect (Legacy Mode) UI is not open.

---

### Procedure

1. On an endpoint with the StellarProtect or StellarProtect (Legacy Mode) agent installed, launch StellarProtect or StellarProtect (Legacy Mode) Setup.
2. Follow one of the procedures listed below according to your operating system:

OPERATING SYSTEM	PROCEDURE
<ul style="list-style-type: none"> <li>• Windows 10 Professional</li> <li>• Windows 10 Enterprise</li> <li>• Windows 10 IoT Enterprise</li> <li>• Windows 10 Fall Creators Update (Redstone 3)</li> <li>• Windows 10 April 2018 Update (Redstone 4)</li> <li>• Windows 10 November 2018 Update (Redstone 5)</li> <li>• Windows 11 Professional</li> </ul>	<ol style="list-style-type: none"> <li>a. Go to <b>Start &gt; Settings</b>.</li> <li>b. Depending on your version of Windows 10, locate the <b>Apps &amp; Features</b> section under one of the following categories: <ul style="list-style-type: none"> <li>• <b>System</b></li> <li>• <b>Apps</b></li> </ul> </li> <li>c. On the left pane, click <b>Apps &amp; Features</b>.</li> <li>d. In the list, click <b>StellarProtect</b> or <b>StellarProtect (Legacy Mode)</b>.</li> <li>e. Click <b>Uninstall</b>.</li> </ol>
<ul style="list-style-type: none"> <li>• Windows 7</li> <li>• Windows 8</li> <li>• Windows Vista</li> <li>• Windows Server 2008</li> <li>• Windows Server 2012</li> <li>• Windows Server 2016</li> <li>• Windows Server 2019</li> <li>• Windows Server 2022</li> <li>• Windows Storage Server 2012</li> <li>• Windows Storage Server 2016</li> </ul>	<ol style="list-style-type: none"> <li>a. Go to <b>Start &gt; Control Panel &gt; Program and Features</b>.</li> <li>b. In the list, double-click <b>TXOne StellarProtect</b> or <b>TXOne StellarProtect (Legacy Mode)</b>.</li> </ol>
<ul style="list-style-type: none"> <li>• Windows Server 2003</li> <li>• Windows XP</li> <li>• Windows 2000</li> </ul>	<ol style="list-style-type: none"> <li>a. Go to <b>Start &gt; Control Panel &gt; Add or Remove Programs</b>.</li> <li>b. In the list, select <b>TXOne StellarProtect (Legacy Mode)</b>.</li> <li>c. Click <b>Remove</b>.</li> </ol>

3. After the StellarProtect or StellarProtect (Legacy Mode) Setup opens, click **Next**.

4. Enter in the StellarProtect or StellarProtect (Legacy Mode) administrator password and click **Next**.
5. Make sure StellarProtect's or StellarProtect (Legacy Mode)'s UI is completely closed before clicking **OK**.
6. The message box indicating StellarProtect or StellarProtect (Legacy Mode) being successfully removed will appear. Click **Finish**.

**Note**

For Windows 7 and Windows Server 2016+ platforms, the installation of StellarProtect requires disabling Windows Defender first. Consequently, after uninstalling StellarProtect, TXOne Networks recommends that you manually enabling Windows Defender for security reasons.

---

# Chapter 7

## Technical Support

Learn about the following topics:

- *Troubleshooting Resources on page 7-2*
- *Contacting TXOne Networks on page 7-3*
- *Other Resources on page 7-4*

## Troubleshooting Resources

Before contacting technical support, consider visiting the following TXOne Networks online resources.

### Using the Support Portal

The TXOne Networks Support Portal is a 24x7 online resource that contains the most up-to-date information about both common and unusual problems.

---

#### Procedure

1. Go to <https://help.txone.com/>.
2. Click the appropriate button to search for solutions.
3. Use the **Search** box to search for available solutions.
4. If no solution is found, click **Live Chat** or **VoIP** service to submit a support case online.

A TXOne Networks support engineer investigates the case and responds in 24 hours or less.

---

### Threat Encyclopedia

Most malware today consists of blended threats, which combine two or more technologies, to bypass computer security protocols. TXOne Networks combats this complex malware with products that create a custom defense strategy. The Threat Encyclopedia provides a comprehensive list of names and symptoms for various blended threats, including known malware, spam, malicious URLs, and known vulnerabilities.

Go to <https://www.encyclopedia.txone.com/> to learn more about:

- Malware and malicious mobile code currently active or "in the wild"
- Correlated threat information pages to form a complete web attack story
- Internet threat advisories about targeted attacks and security threats
- Web attack and online trend information

- Weekly malware reports

## Contacting TXOne Networks

TXOne Networks representatives are available by phone or chat/VoIP services:

**TABLE 7-1. TXOne Networks Contact Information**

U.S.	+1 (346) 586-7975
Netherland	+31 402-310-122
Taiwan	+886 (2) 7727-5120
Chat/VoIP services	<a href="https://help.txone.com/">https://help.txone.com/</a>
Website	<a href="https://www.txone.com/contact/">https://www.txone.com/contact/</a>

- TXOne Networks product documentation:

<https://my.txone.com/>

## Speeding Up the Support Call

To improve problem resolution, have the following information available:

- Steps to reproduce the problem
- Appliance or network information
- Computer brand, model, and any additional connected hardware or devices
- Amount of memory and free hard disk space
- Operating system and service pack version
- Version of the installed agent
- Product serial number and license file, or license key
- Detailed description of the environment where the agent is installed
- Exact text of any error message received

## Other Resources

In addition to solutions and support, there are many other helpful resources available online to stay up to date, learn about innovations, and be aware of the latest security trends.

## Download Center

From time to time, TXOne Networks may release a patch for a reported known issue or an upgrade that applies to a specific product or service. To find out whether any patches are available, go to:

<https://my.txone.com/>

If a patch has not been applied (patches are dated), open the Readme file to determine whether it is relevant to your environment. The Readme file also contains installation instructions.

# Appendix A

## StellarProtect (Legacy Mode) Limitations by Operating Systems

StellarProtect (Legacy Mode) installed on the following operating systems has the limitations as described below.

OPERATING SYSTEMS	LIMITATIONS
Windows 10	<ul style="list-style-type: none"><li>• Unlock the endpoint before updating your Windows 10 operating system to the Anniversary Update, Creators Update, Fall Creators Update, April 2018 Update, October 2018 Update, or later versions.</li><li>• To improve performance, disable the following Windows 10 components:<ul style="list-style-type: none"><li>• Windows Defender Antivirus. This may be disabled via group policy.</li><li>• Windows Update. Automatic updates may require the download of large files, which may affect performance.</li><li>• Windows Apps (Microsoft Store) auto-update. Checking for frequent updates may cause performance issues.</li></ul></li></ul>
Windows 10 Fall Creators Update	OneDrive integration is not supported. Ensure that OneDrive integration is disabled before installing StellarProtect (Legacy Mode).

<b>OPERATING SYSTEMS</b>	<b>LIMITATIONS</b>
Windows 10 April 2018 Update (Redstone 4) and later versions	<ul style="list-style-type: none"><li>• OneDrive integration is not supported. Ensure that OneDrive integration is disabled before installing StellarProtect (Legacy Mode).</li><li>• See the following limitations when working with folders where the <i>case sensitive</i> attribute has been enabled:<ul style="list-style-type: none"><li>• Enabling the <i>case sensitive</i> attribute for a folder may prevent StellarProtect (Legacy Mode) from performing certain actions (e.g., prescan, custom actions) on that folder. Folders that do not have the attribute enabled are not affected.</li><li>• StellarProtect (Legacy Mode) blocks all processes started from folders where the <i>case sensitive</i> attribute is enabled. Additionally, StellarProtect (Legacy Mode) is unable to provide any information for the blocked processes, except for file path.</li><li>• The StellarProtect (Legacy Mode) agent cannot verify file signatures of files saved in folders where the <i>case sensitive</i> attribute is enabled. As a result, DAC exceptions related to signatures cannot work.</li></ul></li></ul>
<ul style="list-style-type: none"><li>• Windows 2000 SP4 (without update rollup)</li><li>• Windows XP SP1</li><li>• Windows 2000 Server SP4</li></ul>	The following functions are not supported: <ul style="list-style-type: none"><li>• DLL/Driver Lockdown</li><li>• Script Lockdown</li><li>• Integrity Monitoring</li><li>• USB Malware Protection</li><li>• Storage Device Blocking</li><li>• Maintenance Mode</li><li>• Predefined Trusted Updater</li></ul>
