Security Management System (SMS) Release Notes

Version 6.2.0.3

This release includes all issues fixed in the *Security Management System Release Notes Version 6.2.0*, *6.2.0.1*, and *6.2.0.2*. For details about those changes, refer to the respective Release Notes on the [Online Help Center](#).

Important notes for SMS

- All v6.2.0 customers can optionally apply this patch so that the issues it addresses are corrected. However, upgrades to a later TOS do not require an installation of this patch first.

- Patch installation should take approximately 15 minutes.

- To prevent your account from being disabled while you wait for authentication resources to become available after the reboot, navigate to **Edit > Preferences** and make sure that you deselect **Lock user after failed login attempts** and **Auto reconnect client to server after a disconnect occurs**. The SMS automatically reboots after you install this release. You will then be prompted to update the SMS client.

- This patch can be uninstalled or rolled back to the previous version.

Release contents

The following enhancements or repairs are included in this release.

Description	Reference
The SMS now supports more server certificates for Trend Vision One.	TIP-126018
Sectigo Certificate Authorities (CAs) are now included as trusted certificates.	TIP-126676
