Chapter 1

Apex One Server Installations

This section outlines the Apex One server system requirements on supported Windows Server platforms.

**Note**

Install the required Windows updates on endpoints to enable Azure Code Signing (ACS). For more information, go to the [Trend Micro Knowledge Base](#).

Fresh Installations on Windows Server 2012 Platforms

Important

- If you install the Apex One server on computers running Windows Server 2012, Trend Micro recommends you enable TLS 1.2 in Windows Server 2012 for secure network communication.
- Windows 2012 R2 requires updates KB2919442 and KB2919355 before installing the Apex One server

Operating System		Edition	Service Pack	Processor	RAM	Available Disk Space	SQL Server	Others
Windows Server 2012	64-bit	Standard	None	At least 1.86 GHz Intel™ Core™2 Duo	• 3GB minimum (exclusively for Apex One)	• 7.0GB minimum Apex One with Endpoint Sensor: • 8.0GB minimum	Apex One only officially supports the specified SQL Server editions. • SQL Server 2012 Express or later • SQL Server 2012 (Enterprise/ Standard) or later Apex One with Endpoint Sensor: • SQL Server 2016 SP1 (Enterprise/ Standard) or later (SQL Server Express not supported)	Gigabit Network Interface Card (NIC) Monitor that supports 1366 x 768 resolution at 256 colors or higher

Chapter 2

Trend Micro Apex One Edge Relay Server Installations

This section outlines the Trend Micro Apex One Edge Relay Server system requirements on supported Windows Server platforms.

- [*Edge Relay Server System Requirements on page 2-2*](#)

Edge Relay Server System Requirements

Before installing the Edge Relay Server, ensure that the target server computer meets the minimum system requirements.

RESOURCE	REQUIREMENTS
Processor	2 GHz dual core
Memory	1 GB (exclusively for the Edge Relay Server)
Disk space	60 GB
Operating system	<ul style="list-style-type: none">• Windows Server 2022• Windows Server 2019• Windows Server 2016
Network card	<ul style="list-style-type: none">• 2 network cards<ul style="list-style-type: none">• One for intranet connection to the Apex One server• One for external connection to off-premises Security Agents• 1 network card configured to use different ports for intranet and Internet connections

Chapter 3

Apex One Security Agent System Requirements

This section outlines the Apex One Security Agent system requirements for fresh installations on supported Windows platforms.

**Note**

Install the required Windows updates on endpoints to enable Azure Code Signing (ACS). For more information, go to the [Trend Micro Knowledge Base](#).

- *[Fresh Installations on Windows Endpoint Platforms on page 3-3](#)*
- *[Fresh Installations on Windows Embedded System Platforms on page 3-5](#)*
- *[Fresh Installations on Windows Server Platforms on page 3-6](#)*
- *[Update Agents on page 3-9](#)*

**Important**

- Resource spikes may occur if a large number of applications are running simultaneously on an endpoint. If the target endpoint is already running low on memory or disk space, Trend Micro recommends upgrading the necessary hardware components prior to Apex One Security Agent installation or upgrade.
- Trend Micro recommends allocating the minimum system requirements listed as dedicated resources for the Security Agent program to ensure adequate performance during extensive scanning operations.

Note

- All Trend Micro testing on Windows Embedded platforms and Storage Servers is performed in a virtualized environment. Because these operating systems are typically run on custom hardware (for example, on point-of-sale terminals), customers must plan to thoroughly test on their target hardware platform prior to deployment in a production environment. In addition, before raising support cases, customers should attempt to reproduce problems in a virtualized environment because this is the environment the Trend Micro support team has available. If the issue is specific to deployments on custom hardware, Trend Micro may require the customer to provide us with remote access to a suitable environment before we can fully respond to support cases.
 - Trend Micro does not support Apex One Security Agent installation on Windows platforms with the Unified Write Filter (UWF) feature enabled.
-

Fresh Installations on Windows Endpoint Platforms

Important

Resource spikes may occur if a large number of applications are running simultaneously on an endpoint. If the target endpoint is already running low on memory or disk space, Trend Micro recommends upgrading the necessary hardware components prior to Apex One Security Agent installation or upgrade.

Trend Micro recommends allocating the minimum system requirements listed as dedicated resources for the Security Agent program to ensure adequate performance during extensive scanning operations.

Note

All Trend Micro testing on Windows Embedded platforms and Storage Servers is performed in a virtualized environment. Because these operating systems are typically run on custom hardware (for example, on point-of-sale terminals), customers must plan to thoroughly test on their target hardware platform prior to deployment in a production environment. In addition, before raising support cases, customers should attempt to reproduce problems in a virtualized environment because this is the environment the Trend Micro support team has available. If the issue is specific to deployments on custom hardware, Trend Micro may require the customer to provide us with remote access to a suitable environment before we can fully respond to support cases.

Trend Micro does not support Apex One Security Agent installation on Windows platforms with the Unified Write Filter (UWF) feature enabled.

**Note**

- The Security Agent supports Windows Embedded systems when installed with specific core components. For detailed information regarding Windows Embedded system required components, see the Trend Micro Knowledge Base (<https://success.trendmicro.com/solution/1105117>).
- Due to the complexity of Windows Embedded systems, Apex One may not be able to support all optional Windows components. Contact your technical support team if you encounter incompatibilities when using a combination of optional components.

Fresh Installations on Windows Server Platforms

**Important**

Resource spikes may occur if a large number of applications are running simultaneously on an endpoint. If the target endpoint is already running low on memory or disk space, Trend Micro recommends upgrading the necessary hardware components prior to Apex One Security Agent installation or upgrade.

Trend Micro recommends allocating the minimum system requirements listed as dedicated resources for the Security Agent program to ensure adequate performance during extensive scanning operations.

**Note**

All Trend Micro testing on Windows Embedded platforms and Storage Servers is performed in a virtualized environment. Because these operating systems are typically run on custom hardware (for example, on point-of-sale terminals), customers must plan to thoroughly test on their target hardware platform prior to deployment in a production environment. In addition, before raising support cases, customers should attempt to reproduce problems in a virtualized environment because this is the environment the Trend Micro support team has available. If the issue is specific to deployments on custom hardware, Trend Micro may require the customer to provide us with remote access to a suitable environment before we can fully respond to support cases.

Trend Micro does not support Apex One Security Agent installation on Windows platforms with the Unified Write Filter (UWF) feature enabled.

**Note**

For processor and RAM requirements for a specific platform, refer to the Microsoft system requirements for that platform.

Update Agents

**Important**

Resource spikes may occur if a large number of applications are running simultaneously on an endpoint. If the target endpoint is already running low on memory or disk space, Trend Micro recommends upgrading the necessary hardware components prior to Apex One Security Agent installation or upgrade.

Trend Micro recommends allocating the minimum system requirements listed as dedicated resources for the Security Agent program to ensure adequate performance during extensive scanning operations.

RESOURCE	REQUIREMENTS
Processor	Minimum 1GHz (32-bit) / 2GHz (64-bit) Intel Pentium or equivalent (2GHz recommended)
RAM	2GB minimum (exclusively for Apex One)
Available disk space	<ul style="list-style-type: none"> 1.8GB minimum 2.3GB recommended

RESOURCE	REQUIREMENTS
Display	Monitor that supports 1024 x 768 resolution at 256 colors or higher

Chapter 4

Upgrades and Virtualization Support

This section outlines the system requirements for upgrading the server and agent programs, and supported virtualization platforms.

- *[Apex One Server Upgrade Requirements on page 4-2](#)*
- *[Security Agent Upgrade Requirements on page 4-2](#)*
- *[Apex One Server Web Console Requirements on page 4-2](#)*
- *[Virtual Desktop Support System Requirements on page 4-3](#)*

Apex One Server Upgrade Requirements

This version of Apex One supports upgrading from the following version:

- Apex One

Before upgrading, ensure that the server meets the necessary hardware requirements for your version of Windows.

For more information, see [Apex One Server Installations on page 1-1](#).

Security Agent Upgrade Requirements

Apex One Service Pack 1 supports upgrading from the following version:

- Apex One

Keep your older Apex One servers if you have agents running Windows XP (or earlier), Windows 8.0, or Windows Server 2008 (or earlier) and you want to continue managing these agents. For details on managing these agents, see the topic *Unsupported Operating Systems* in the *Installation and Upgrade Guide*.

Important

Resource spikes may occur if a large number of applications are running simultaneously on an endpoint. If the target endpoint is already running low on memory or disk space, Trend Micro recommends upgrading the necessary hardware components prior to Apex One Security Agent installation or upgrade.

Trend Micro recommends allocating the minimum system requirements listed as dedicated resources for the Security Agent program to ensure adequate performance during extensive scanning operations.

Apex One Server Web Console Requirements

RESOURCE	REQUIREMENTS
Processor	300MHz Intel Pentium processor or equivalent
RAM	128MB minimum
Available disk space	30MB minimum
Display	Monitor that supports 1366 x 768 resolution at 256 colors or higher

RESOURCE	REQUIREMENTS
Browser	<ul style="list-style-type: none"> • Chrome • Microsoft Edge (Legacy and Chromium editions)
	 Note Windows UI is not supported.

Virtual Desktop Support System Requirements

The following table lists the virtual platforms supported by Virtual Desktop Support.

VIRTUALIZATION PROVIDER	SUPPORTED PLATFORMS
VMware	<ul style="list-style-type: none"> • VMware vCenter: 5.x, 6.x, 7.x, 8.x • VMware View: 4.x, 5.x, 6.x • VMware Horizon View: 6.x, 7.x, 8.x
Citrix	<ul style="list-style-type: none"> • Citrix XenServer: 6.x, 7.x
