Predefined Templates

To help users more quickly identify the sensitive data within corporate networks, Data Loss Prevention provides predefined templates for the majority of the predefined data identifiers. In addition to the templates derived directly from data identifiers, Data Loss Prevention also provides users with specific templates that help address regulatory compliance concerns.

Note

The following tables outline the predefined templates that are not based directly off of predefined data identifiers. For more information about templates based off of data identifiers, see:

- [Predefined Expressions on page 1-2](#)
- [Predefined Keyword Lists on page 1-62](#)

Trend Micro products provide the following predefined regulatory compliance templates:
